# CREATING THE CAMPAIGN

## DESIGNING ADVENTURES

When creating adventures for Star Fleet Intelligence characters, the gamemaster must keep in mind the unusual nature and duties of the Command, whose assignments include intelligence-gathering, espionage, counter-intelligence, and other secret missions. Though all the general rules for designing scenarios do apply, the gamemaster will want to make sure that the objectives of Intelligence assignments are more complex, and therefore less obvious than in other Star Fleet adventures. That does not mean creating such obscure and ambiguous storylines that the players can barely figure out what they are supposed to do. Nor should his attempts to baffle the players be so extreme that in their frustration they lose interest in playing the game. What the gamemaster will want to emphasize are the elements of mystery and intrigue during encounters and the general course of play.

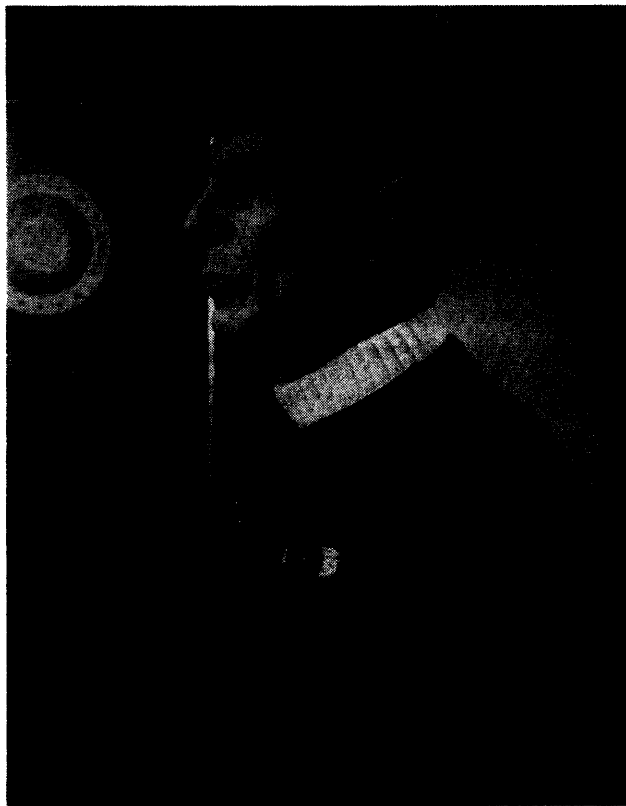

**STAR TREK: The Role Playing Game** is a game where the players work together (more or less). The 'dirty tricks' nature of intelligence-oriented adventures should not be an excuse for within-group mayhem, unless the gamemaster includes expendable NPCs in the group for this purpose. Even so, repeated treachery by gamemaster-controlled NPCs may cause player characters to become hostile toward all NPCs, an equally undesirable and unrealistic situation.

There is one additional aspect to think about. If desired, the gamemaster could design adventures with some extraneous information on a related issue, situation, or potential future problem. As the group completes its assignment objectives, this information could lead them on to future scenarios. In this way, a gamemaster could link seemingly unrelated missions together by incorporating clues that point toward a grand operation to be played at a later time.

Every gamemaster deals with a unique group of players, each possessing their own gaming strengths and weaknesses. Some groups may be interested in thoughtful, analytical problems, while others prefer 'space opera' galactic warfare and related assignments. The gamemaster should present adventures that would be of greatest interest to his players. For bloodthirsty players, liquidation and termination missions might be the most fun. Others might enjoy relatively simple transportation or infiltration missions. There are enough possibilities within Star Fleet Intelligence to satisfy both extremes.

When spies and espionage abound, it is tempting for gamemasters to make every encounter appear to have galaxy-shaking importance. This may not be desirable. The gamemaster should not induce a state of hysterical paranoia among his players when they are obviously ill-equipped to handle the end of the universe. Besides, there should not be a dagger behind every cloak, and not every suspicious-looking NPC is a would-be assassin, even in an intelligence-oriented campaign. Many spy missions are boring, routine investigations. Unfortunately, such things do not often make for enjoyable role playing, and so the opposite extreme is too often used instead.

## ADAPTING PUBLISHED ADVENTURES

Published scenarios and adventures can be a great help to gamemasters. However, many published adventures were not designed with Intelligence Command player characters in mind. Therefore, the gamemaster may have to modify the adventure's plot significantly for an intelligence-oriented group or campaign. By adapting or expanding on the background information, published adventures can serve as an excellent backdrop for a spy adventure, even if that was not the author's intention. Gamemasters should add a less obvious, more interesting (from an Intelligence aspect) objective to the adventure. Some examples are given below.

Any adventure dealing with new or experimental equipment, such as a shipboard weapon system, transporter, or communicator, would definitely interest Star Fleet Intelligence, especially if the equipment were of non-Federation origin. Adding an Intelligence agent to the group or giving one character a dual identity as an Intelligence operative could add another element of intrigue to the story. The Intelligence agent may even have different objectives from those of the rest of the group.

Any adventure involving planets near the Romulan or Klingon border or within the Triangle could be modified for Star Fleet Intelligence Command agents. The gamemaster could inflate even the most minor incidents into Federation-endangering plots. Why did Captain Cyrano Jones land at a Klingon-controlled world right after leaving Federation space? Is there any connection between Jones and several secretly reported Klingon deaths?

Any adventure might give a Star Fleet Command (non-Intelligence) crew reason to contact an Intelligence agent, or vice versa. If it turns out that the agent knew about a certain danger but did not tell the group because of need-to-know, an interesting encounter might ensue. There is a little rivalry between Intelligence and the rest of Star Fleet, and this could be carefully developed into a series of minor, but annoying, encounters.

If the adventure is centered around a group of traders, Star Fleet Intelligence has been known to "encourage merchant ship captains to lend assistance temporarily". The player characters could find themselves involved in an adventure that they did not really want, usually in exchange for something. Certainly, a Star Fleet Intelligence agent could be a formidable friend or dangerous foe to the group's normal methods of operation.

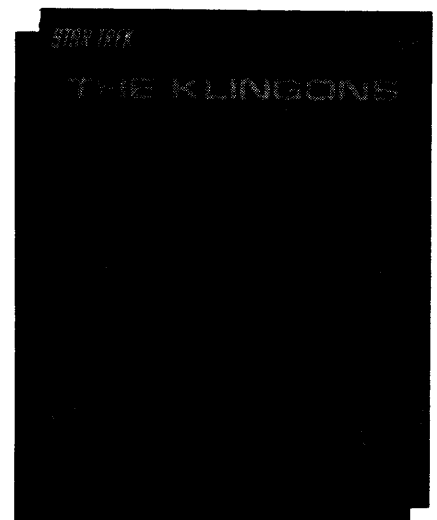

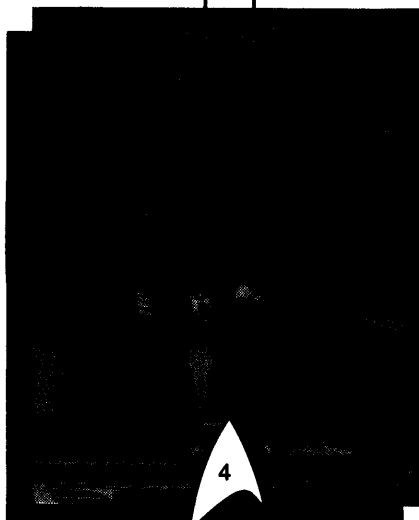

## TIE-IN ENCOUNTERS

Even if the gamemaster is not running an intelligence-oriented adventure or campaign, Intelligence personnel could still play active bit-parts. For example, some of the most interesting scientific research being done in the Federation is under Intelligence jurisdiction. Prisoners, whether political or criminal, occasionally escape and create assorted problems for their pursuers (and maybe bystanders as well). Klingon, Romulan, and Orion activities are always of interest to Star Fleet's agents in grey.

Any minor, routine encounter that would normally involve law enforcement officers could use Intelligence agents instead, provided a logical explanation is given for their presence. Merchants (player characters as well as NPCs) occasionally run afoul of various laws, and so they might attract Intelligence Command surveillance, particularly if they venture frequently into non-Federation space. Though innocent of any crimes, merchant player characters could be mistaken for someone else because they happened to be in the wrong place at the wrong time.

Perhaps Star Fleet Intelligence has placed a certain quadrant of space under temporary quarantine, right after the players' trader characters have picked up a valuable cargo destined for a planet in that sector. The group's financial ruin is assured if they fail to deliver, and hazard after hazard await them should they try to fulfill their contract. Or perhaps the group's Star Fleet vessel receives special instructions to respond immediately to the sector at emergency speed, with no reason given.

The gamemaster can use a moderate amount of spy-thriller tactics to help liven up any ST:RPG campaign that might be getting a bit dull. A dash of excitement and intrigue does tend to keep the juices flowing. However, keep in mind that if the group does not like the gamemaster's tactics, for whatever reason, they will probably let him know in no uncertain terms. At that point, some degree of mutual negotiation may be necessary, or the gamemaster may find the player characters themselves taking no prisoners.

# JUDGING ORGANIZATIONS

## INTELLIGENCE BASES

The Operating Forces of Star Fleet Intelligence Command are divided into ten sectors, and Star Fleet Intelligence maintains at least one installation within each sector. These bases can be either sector headquarters or field stations. When choosing which world should become a base, SFIC considers the planet's population size, starport facilities, and location. All Operating Forces Sectors are organized identically, but not every sector has an Activities Unit. There would be little need for a Tholian Activities Unit in Klingon Sector Intelligence, for example. (The following Intelligence Sector Tables list the Activities Units for each sector.) The headquarters houses all Technical Services Activities Units for that region of space, and each field station contains every corresponding Data Section. Each planet's star is noted in parenthesis.

Field operatives should remember that though these stations are places of safety, they are well-known to many inhabitants of the sector. Anyone frequenting such a station would lose his anonymity immediately. Of course, this is not a problem when operating from field stations at star bases. Intelligence agents assigned to star bases are not considered to be serving with the Star Fleet Headquarters Command just because they are at the star base.

### SECTOR 1, NW INTELLIGENCE

#### Activities Units:

Internal Activities Unit

**Headquarters:** Star Base 7      2.74N    4.26W

#### Bases:

Alpha Centauri (Al Rijil)	1.27N	2.92W
Andor (Epsilon Indi)	1.82N	2.22W
Bardex III (Bardex)	2.02N	3.21W
Cerberus (Eta Lupi)	6.66N	4.31W
Dadax (Dextera 273)	5.47N	0.25W
Darius III (Delta Darius)	0.34N	7.78W
Edo (Epsilon Minora)	0.51N	4.11W
Hurlin (Zeta Paor)	5.68N	6.33W
Izar (Epsilon Bootis)	4.37N	4.44W
Kadacohr (Kadass)	1.44N	3.41W
Koromond (Koromandas)	0.54N	1.24W
MAO III (MAO)	4.91N	2.34W
Maximilian (Zeta Geminorum)	3.28N	0.11W
Tellar (61 Cygni)	1.49N	1.91W
Terra (Sol)	1.23N	2.79W
Star Base 1	1.23N	2.79W
Star Base 4	1.23N	0.98W
Star Base 5	2.74N	1.23W
Star Base 6	3.23N	2.54W
Star Base 8	1.23N	4.98W
Star Base 16	5.70N	2.00W
Star Base 24	3.00N	6.00W

### SECTOR 2, NE INTELLIGENCE

#### Activities Units:

Gorn Activities Unit

Internal Activities Unit

Tholian Activities Unit

**Headquarters:** Star Base 3      0.51N    3.50E

#### Bases:

Cygnat XIV (Cygnus)	4.05N	0.41E
Marcus (6-23)	3.07N	3.28E
Planet Q (Bursar's Beacon)	1.89N	6.13E
Ramilles II (Ramilles)	5.37N	2.35E

### SECTOR 3, SE INTELLIGENCE

#### Activities Units:

Gorn Activities Unit

Internal Activities Unit

Klingon Activities Unit

Orion Activities Unit

Romulan Activities Unit

**Headquarters:** Star Base 15      3.77S    3.31E

#### Bases:

Aldebaran (Alpha Tauri)	2.01S	2.01E
Alphosa (Fabrini Green)	6.98S	2.57E
Argelius (Rho Magnin)	5.18S	1.97E
Regulus (Alpha Leonis)	3.99S	2.81E

### SECTOR 4, SW INTELLIGENCE

#### Activities Units:

Internal Activities Unit

Klingon Activities Unit

**Headquarters:** Star Base 14      3.74S    0.02W

#### Bases:

Adhara (Epsilon Canaris)	3.53S	2.26W
Betelgeuse (Alpha Orionis)	1.93S	1.96W
Catulla (Theta Pictoris)	1.15S	0.56W
Cochrane I (Zeta Riguli)	2.73S	5.28W
Jallamora (Trasenn 685)	0.36S	7.46W
Novoe Petrograd (Jaldiz)	1.34S	3.55W
Vulcan (40 Eridani)	0.09N	2.31W
Star Base 13	0.42S	1.46W

### ROMULAN SECTOR INTELLIGENCE

#### Activities Units:

Gorn Activities Unit

Internal Activities Unit

Romulan Activities Unit

**Headquarters:** Star Base 20      5.45S    6.46E

#### Bases:

Fenserck Major (Fencirce)	3.35S	8.15E
Ulindell (Weymith)	4.83S	7.34E
Star Base 17	2.61S	7.89E

### ORION SECTOR INTELLIGENCE

#### Activities Units:

Internal Activities Unit

Klingon Activities Unit

Orion Activities Unit

**Headquarters:** Star Base 12      8.34S    3.00E

#### Bases:

K'Ihrgynx (Ggramrudmin)	7.85S	0.71E
-------------------------	-------	-------

## KLINGON SECTOR INTELLIGENCE

### Activities Units:

Internal Activities Unit  
Klingon Activities Unit  
Orion Activities Unit

**Headquarters:** Star Base 23      6.49S    2.50W

### Bases:

Chaidik	3.90S	5.87W
Thranstor	4.97S	2.23W
Star Base 22	5.56S	4.53W
Star Base 27	8.03S	0.42W

## TRIANGLE SECTOR INTELLIGENCE

### Activities Units:

Internal Activities Unit  
Klingon Activities Unit  
Orion Activities Unit  
Romulan Activities Unit

**Headquarters:** Star Base 10      8.55S    5.60E

### Bases:

Baker's World (Baker's Star)	9.50S	6.2E
Outpost 1	9.0S	4.5E
Outpost 2	8.0S	6.7E
Remfry (Zoeller)	10.4S	6.4E

## GORN SECTOR INTELLIGENCE

### Activities Units:

Gorn Activities Unit  
Internal Activities Unit  
Romulan Activities Unit

**Headquarters:** Star Base 18      0.22S    7.76E

**Bases:** None

## THOLIAN SECTOR INTELLIGENCE

### Activities Units:

Internal Activities Unit  
Tholian Activities Unit

**Headquarters:** Star Base 19      5.00N    3.00E

### Bases:

Familiarity (Beta Maxim 437)	6.31N	3.22E
------------------------------	-------	-------

## FRONT ORGANIZATIONS

Below is a partial list of front organizations created by Star Fleet Intelligence Command for its field agents. All companies are staffed by personnel from various Front Organization Sections and/or civilian workers. In addition to giving cover identities to deep-cover operatives, many of these companies also provide needed services in their areas. Several even offer public stock, although shareholders are never aware of the company's primary function.

**Name:** ACME STARSHIP MAINTENANCE, LTD.

**UFPSC Symbol:** AcStMt

*Home Office Location:* San Francisco, Terra

*Intelligence Station HQ:* Terra

*President/CEO:* Randolph Kling, Commodore

*CEO Intelligence Position:* Station Chief, Terra

*Chartering Organization:* UFP Securities and  
Exchange Commission

*Founding Date:* 2/2203.13

### Principal Divisions

*Division Name:* Intrasystems, Inc.

*Division Head:* Samuel Boniphant,  
Lieutenant Commander

*Intelligence Position:* Station Chief, Maximilian

*Chief Product:* Electronic Circuits

*Division Name:* Requip Operators

*Division Head:* Wujazk, Commander

*Intelligence Position:* Station Chief, Kadacohr

*Chief Product:* Starship Repair Servicing

**Stock Profile:** None

*Price/Date:* None

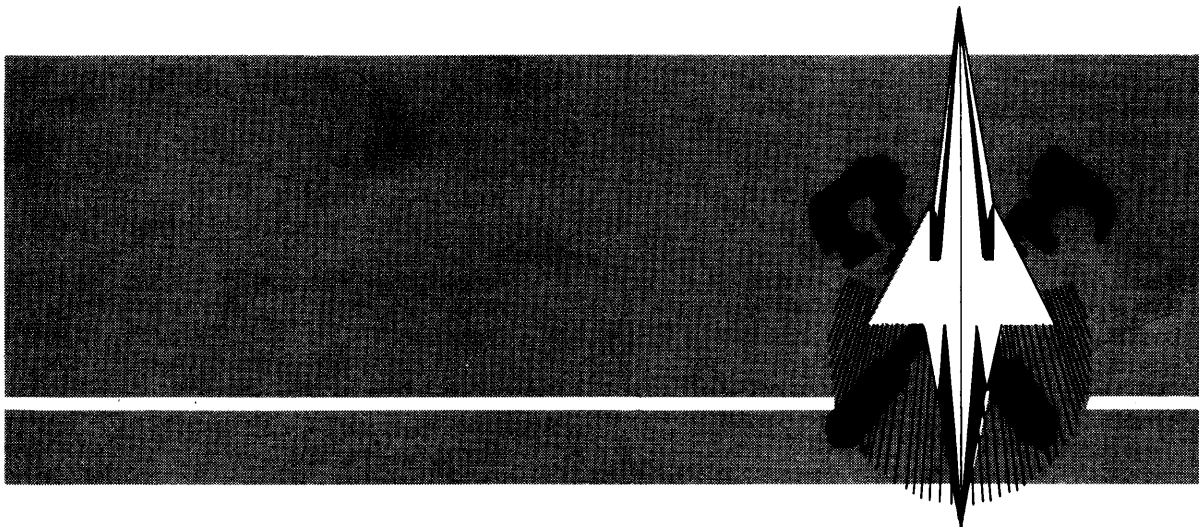

*Dividend:* None

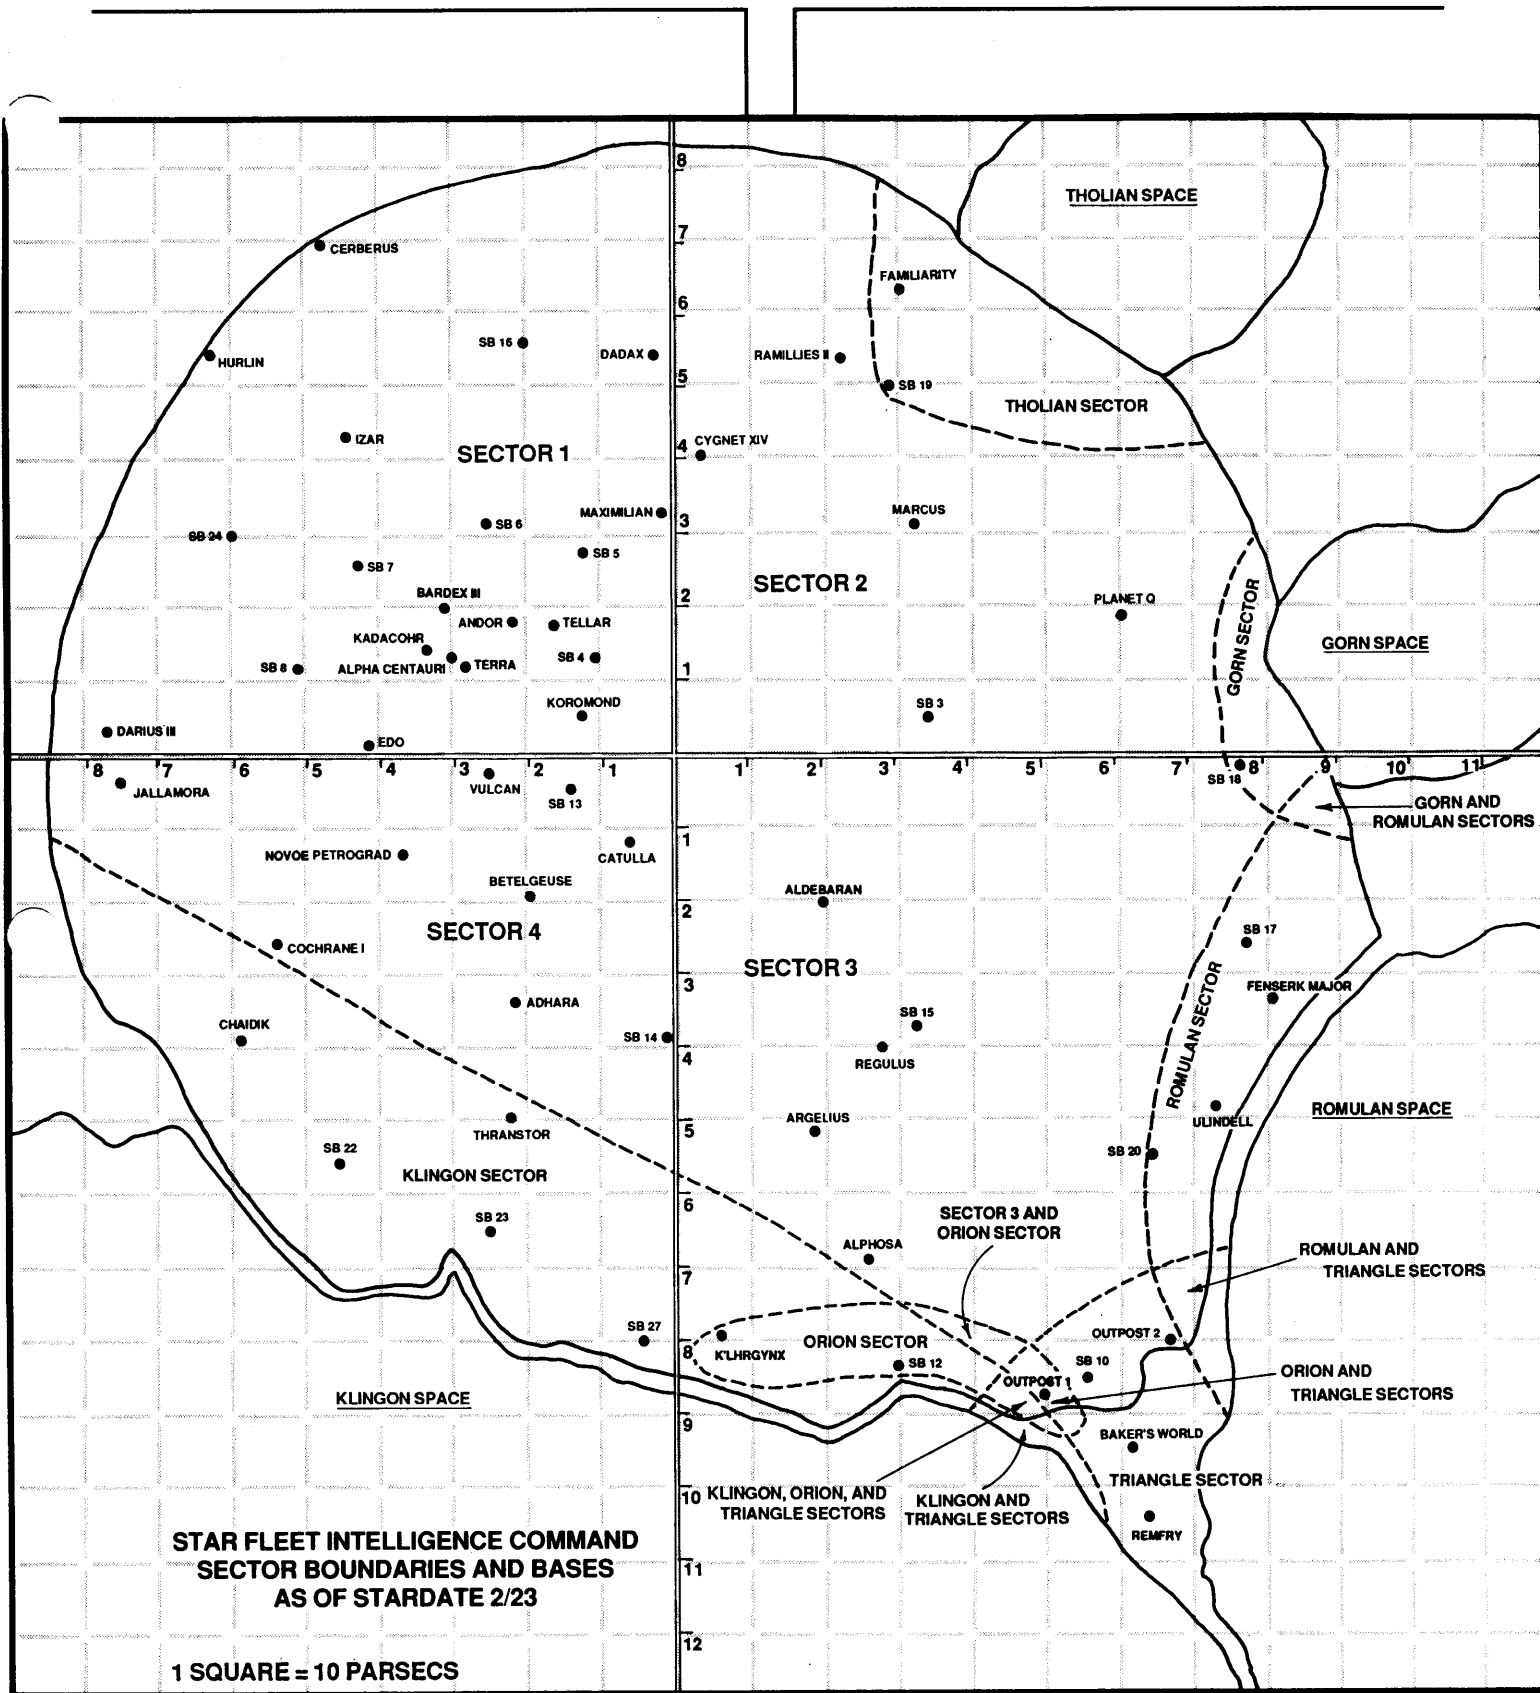

**Balance Sheet, Year Ended:** 2/2301

Not available

### Operations Summary:

One of Star Fleet Intelligence's newest front organizations, this company will be a major source of future cover identities within Sector 1 Intelligence. Most covers will deal with skills needed to make starship repairs.

**Name: AJAX INTERSTEL TOURS, LTD.****UFPSC Symbol:** AxISTu*Home Office Location:* New York, Terra*Intelligence Station HQ:* Star Base 17*President/CEO:* Stilad, Commodore*CEO Intelligence Position:* Station Chief, SB 17*Chartering Organization:* UFP Securities and  
Exchange Commission*Founding Date:* 2/1004.13**Principal Divisions***Division Name:* Gamma Guides*Division Head:* Wenk Ifftiss, Captain*Intelligence Position:* Front Organization Station  
Section Head, Star Base 17*Chief Product:* Interstellar Cruises*Division Name:* Fenserk Travel Agencies*Division Head:* Kujally, Commodore*Intelligence Position:* Station Chief, Fenserk Major*Chief Product:* Vacation Arrangements*Division Name:* FronTours*Division Head:* Erin Saksen, Commander*Intelligence Position:* Front Organization Section

**Operations Summary:**

This front organization operates throughout Orion Sector Intelligence. It can provide cover identities for agents with merchant, administrative, or starship operation skills.

**MAJOR ONGOING MISSIONS**

At any given moment, Star Fleet Intelligence Command is conducting a number of major intelligence missions. Following is a partial list of current cases, force tasks, projects, and operations, with pertinent data for each.

**Mission Code Name: OPERATION AMBERGRIS****SECLAR:** 4**Case/Contact Officer:** Lieutenant Commander Semak**Mission Classification:** Investigation**Intelligence Sector/Base:** Triangle Sector  
Intelligence/Baker's World**Case Briefing Summary:**

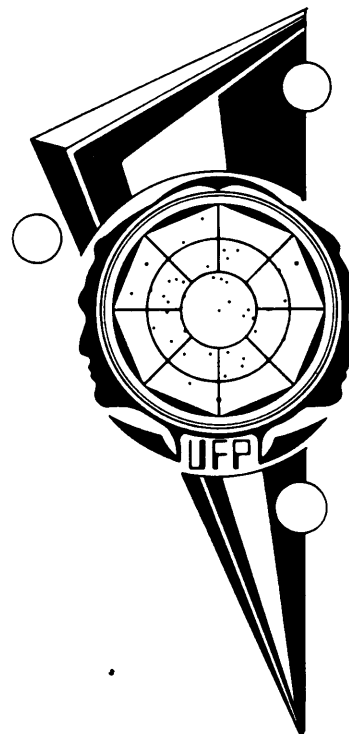

The planet Morning Garden, a trade associate of the Triangle's Affiliation of Outer Free Worlds, has been the scene of several recent murders, including that of a Klingon Imperial. Because of the populace's generally pacifistic nature, such events are unusual. Although the planet's ruling body, the Gathering of Advisors, has no formal relations with the Federation, they have called in Star Fleet (unofficially) to investigate the deaths. This is a surprising concession, and the task group should be as helpful as possible, while maintaining a low profile.

**Other Data:**

The gamemaster will find world log and limited information on Morning Garden in FASA's **The Triangle** supplement. The gamemaster should also prepare additional details, NPCs, and the circumstances and motivations surrounding the deaths.

**Current Status:**

Available for task group assignment.

**Mission Code Name: OPERATION ANGEL WATCH****SECLAR: 5****Case/Contact Officer:** Commodore Chuck L. Winslow**Mission Classification:** Infiltration/Termination**Intelligence Sector/Base:** Klingon and Orion Sectors  
Intelligence**Case Briefing Summary:**

Among the many *kuve*, or slave, races of the Klingon Empire, there are many intelligent, freedom-seeking beings willing to combat their Klingon masters if provided with equipment and resources. These beings can also sow confusion and mayhem on colony worlds where several rivaling Klingon lines share control. The planet Kuthal, just within the Klingon border near the Triangle, offers precisely these conditions. Though an insignificant backwater in many respects, it could serve as an ideal site to affect Klingon politics.

The assignment is to smuggle an assortment of Klingon hand weapons (mostly acquired from Orion traders) onto Kuthal. Agents will arm and train members of the Kuthalian race as a prelude to kidnapping and killing the planet's Klingon Military Governor and most of his staff. The blame will be placed on the second-in-command to create dissent between competing families.

**Other Data:**

The gamemaster must generate and populate the world of Kuthal, as well as create appropriate details describing the Klingon political situation there. He should also prepare in advance tactical maps showing the Klingon military bases, major NPCs, and other background information, being sure to keep all facts consistent with **The Klingons** supplement.

**Current Status:**

Available for task group assignment.

**Mission Code Name: OPERATION BERMUDA****SECLAR: 4****Case/Contact Officer:** Admiral chiGuy Teurook**Mission Classification:** Investigation**Intelligence Sector/Base:** Orion Sector Intelligence/  
StarBase 27**Case Briefing Summary:**

The Federation has lost an unusually high number of starships in the Selka system, which has had an adverse effect on trade. Not only has the loss of ships discouraged growth and development of the region, but the situation has become politically embarrassing for the Federation as well. Investigate and, if possible, correct the situation.

**Other Data:**

Though never referred to by name, this mission provides the main storyline for the FASA adventure **The Mines of Selka**. Though the gamemaster might find it helpful to refer to that book, he may also choose to create entirely new details for the assignment.

This mission is unusual for two reasons. First, the group's briefing takes place at Star Base 27, even though that base is within the jurisdiction of Klingon Sector Intelligence. Also, the Contact Officer is a Star Fleet Base Commandant and not a member of the Intelligence Command.

**Current Status:**

Available for task group assignment.

**Mission Code Name: CASE BRASS IDOL****SECLAR: 7****Case/Contact Officer:** Lieutenant Commander  
Adamm Stone**Mission Classification:** Recovery**Intelligence Sector/Base:** Romulan Sector/Daran V**Case Briefing Summary:**

A Romulan battlecruiser captured during the Romulan War is in storage as a museum ship at Memory Alpha. No one there knows the vessel's true history, believing it to be an unsuccessful Federation prototype. Unfortunately, someone must have discovered its true identity, because the vessel has been stolen. It must be recovered before the thieves can refit it with new weapons and propulsion systems used for military purposes.

**Other Data:**

This assignment constitutes the main storyline for the FASA adventure **Old Soldiers Never Die**, though the players will not realize this until the adventure is well underway. The only major difference is that the adventure does not use Intelligence personnel as player characters. The adventure book would help a gamemaster run this assignment, but he could also make up his own details.

**Current Status:** Available for task group assignment.

**Mission Code Name: OPERATION BREWSTER****SECLAR: 5****Case/Contact Officer:** Commodore Randolph Kling**Mission Classification:** Transportation**Intelligence Sector/Base:** Sector 1 Intelligence/Terra**Case Briefing Summary:**

The premier of a world rich in rubidium is on a combined diplomatic/sightseeing tour of the inner Federation. Rubidium is used in certain high-tech scientific and medical applications, but the limited quantities available have restricted its use in research. The premier's world, though within Federation space, is not a member of the Federation. He is currently considering petitioning for membership, which would strongly please the UFP Diplomatic Affairs Bureau. Unfortunately, he has several political enemies who would *not* like to see his world join. The assignment is to protect the premier's and his party's lives.

**Other Data:**

The gamemaster is free to generate and establish the location of the premier's planet. He should also prepare NPCs, a tour itinerary, and other background in advance. The nature and composition of the assassination attempts (if any) are left to the gamemaster's discretion and imagination.

**Current Status:**

Available for task group assignment.

**Mission Code Name: OPERATION BUCHMANN****SECLAR: 6****Case/Contact Officer:** Unspecified**Mission Classification:** Surveillance**Intelligence Sector/Base:** Klingon Sector Intelligence**Case Briefing Summary:**

The purpose of this mission is to survey the outer frontiers of Federation space for dangerous levels of Berthold radiation, which can disintegrate Humanoid tissue within 72 hours. This comprehensive survey will also determine whether affected areas have any strategic military value to either the UFP or the Klingon Empire.

**Other Data:**

The amount of funds, personnel, and equipment allocated to this operation is much larger than what would be normal for such an assignment. Although there has been no internal investigation as yet, the Office of the Auditor General may soon be investigating this operation's activities for possible fiscal irresponsibility.

**Current Status:**

Underway; all necessary personnel have already been assigned.

**Mission Code Name: PROJECT DEEPTRENCH****SECLAR: 4****Case/Contact Officer:** Lieutenant Commander

Valentina P. Ilianov

**Mission Classification:** Surveillance**Intelligence Sector/Base:** Orion and Klingon Sectors

Intelligence/Star Bases 12 and 27

**Case Briefing Summary:**

Project Deeptrench is assigned to monitor the activities of various Orion clans. Numerous independent deep-cover task groups serving with the Orion Sector are already assigned to the project.

**Other Data:**

Though not referred to by name, this assignment is mentioned in the FASA adventure **The Mines of Selka**. Instead of having the Intelligence player characters investigate the Selka system, they could continue this project instead. The adventure book would be somewhat helpful, but not necessary to run this assignment.

**Current Status:** Available for task group assignment.

**Mission Code Name: PROJECT ECHO BRAVO****SECLAR: 5****Case/Contact Officer:** Captain U Llangiwell**Mission Classification:** Not applicable (Research)**Intelligence Sector/Base:** Sector 3 Intelligence,

in conjunction with the Office of Planning and Research

**Case Briefing Summary:**

Engineers are working to create a new technological breakthrough in subspace communications. Their goal is to develop subspace equipment capable of boosting transmission speed from Warp 15 to approximately Warp 30.

**Other Data:**

This is an ongoing research project of major importance. To date, there has been little success.

**Current Status:**

Research in progress.

**Mission Code Name: PROJECT FARSIGHT****SECLAR: 6****Case/Contact Officer:** Admiral X. W. Summers**Mission Classification:** Surveillance**Intelligence Sector/Base:** Romulan Sector Intelligence/

Star Base 20

**Case Briefing Summary:**

A classified intelligence-gathering installation operates within the Romulan Neutral Zone. Located on a planetoid, the base is manned by Intelligence agents monitoring Romulan warship activity deep within Romulan space.

**Other Data:**

This assignment is derived from background information contained in the FASA adventure **Where Has All The Glory Gone?** In that booklet, the player characters (non-Intelligence starship crewmembers) believe that they are coming to the aid of the planetoid base, discovering only later that they are rescuing Romulans. To adapt this adventure, the players' group could actually come to a SFIC installation's aid, and/or an Intelligence group could replace the characters provided in the book. Though helpful, the adventure booklet is not necessary to run this assignment.

**Current Status:**

Available for task group assignment.

**Mission Code Name: PROJECT HONORBOUND****SECLAR: 7****Case/Contact Officer:** Commander Shan Tharon**Mission Classification:** Recovery**Intelligence Sector/Base:** Triangle and Romulan Sector Intelligence**Case Briefing Summary:**

Agents should make efforts to locate and befriend Romulan *k'manatri*, outcasts from Romulan Empire society. Star Fleet Intelligence realizes that *K'manatri* may have intelligence value that should be exploited.

**Other Data:**

This assignment provides the main storyline for the FASA adventure **The Outcasts**. The only major difference is that the adventure does not specify Intelligence personnel as player characters. The book would help a gamemaster run this assignment, but he could also make up his own details. Having **The Romulans** supplement would also be very helpful.

**Current Status:**

Available for task group assignment.

**Mission Code Name: PROJECT KELLY RUNNER****SECLAR: 5****Case/Contact Officer:** Lieutenant Commander Sporik**Mission Classification:** Surveillance/Recovery**Intelligence Sector/Base:** Orion Sector Intelligence/  
Star Base 12**Case Briefing Summary:**

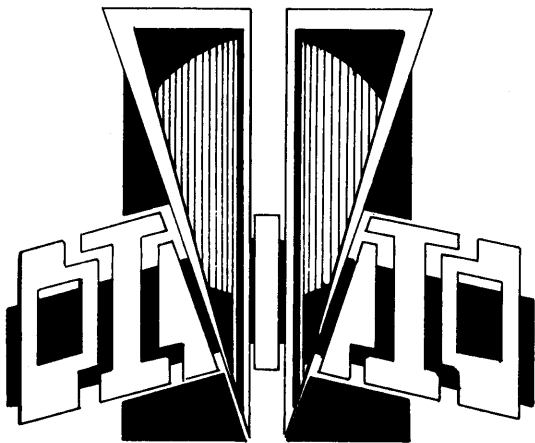

This mission is assigned to coordinate efforts to locate and seize Orion starships and crews that traffic in Green slavery within Federation space.

**Other Data:**

Numerous independent deep-cover task groups serving with Orion Sector are conducting surveillance or raiding missions for this project.

**Current Status:**

Available for task group assignment.

**Mission Code Name: OPERATION PEREGRIN****SECLAR: 3****Case/Contact Officer:** Lieutenant Commander  
Arturo S. LaChance**Mission Classification:** Investigation**Intelligence Sector/Base:** Sector 2 Intelligence**Case Briefing Summary:**

According to an unidentified merchant, the dilithium-cracking station on the uninhabited Type K planet of LKC-8099 has exploded, decimating half a continent. The possibility exists that the cause was not natural. Because of the importance of that outpost, Star Fleet Intelligence has taken over the investigation.

**Other Data:**

The gamemaster is free to generate and establish the location of LKC-8099, as well as any tactical maps and the actual cause of the explosion.

**Current Status:**

Available for task group assignment.

**Mission Code Name: PROJECT TAPESTRY****SECLAR: 6****Case/Contact Officer:** Captain Slavik**Mission Classification:** Surveillance/Infiltration**Intelligence Sector/Base:** Romulan and Triangle Sectors Intelligence**Case Briefing Summary:**

The overall assignment of this mission is to discover more information on the Romulan Star Empire's internal political structure. Agents are also to uncover possible means of infiltrating and subverting elements of the Empire. Assignments include interrogating freetraders and any others who have had direct contact with the Star Empire, and closely monitoring subspace communication for additional clues.

**Other Data:**

The gamemaster should create additional details that conform to **The Romulans** supplement.

**Current Status:**

Available for task group assignment.

## COMMAND POSITIONS

There are many different positions within Star Fleet Intelligence Command. For convenience, the most important are listed below to help the gamemaster figure out who is who.

### CHIEF OF STAR FLEET INTELLIGENCE COMMAND

This is the highest-ranking individual in Star Fleet Intelligence Command. There is only one Chief, and he always has a Chief of Staff.

### DEPUTY CHIEF

There are three Deputy Chiefs: one for the Administration Division, one for the Plans and Policies Division, and one for the Operations Division. They are the second-highest-ranking officers in Star Fleet Intelligence, and are responsible for their respective Divisions. Each officer always has a Chief of Staff.

### ASSISTANT DEPUTY

There are four Assistant Deputies: one for the Administration Division, one for the Plans and Policies Division, one for the Operating Forces Subdivision of the Operations Division, and one for the Technical Services Subdivision of the Operations Division. They are the seconds-in-command to their Deputy Chiefs. These officers are usually assigned a Chief of Staff. All Operating Forces Sector Chiefs are ultimately responsible to the Assistant Deputy of Operating Forces.

### DIVISION CHIEF

There are eleven Division Chiefs, and each one is in charge of an office in the Administration or Plans and Policies Division. All these officers have a Chief of Staff.

### CHIEF OF STAFF

These officers work directly with high-echelon commanding officers to administer the vast crew of subordinates under that officer. In a sense, they serve as super-yemen to their commanders. Their authority varies with how much authority their immediate superior has. The Chief of Staff for the Chief of Star Fleet Intelligence has much more responsibility and clout than does the Chief of Staff for a Division Chief.

### SECTOR CHIEF OF FIELD STATIONS

Each of the ten Operating Forces Sectors has a sector chief. This officer supervises the maintenance of all Intelligence bases within his sector and ensures that enough resources are available. These officers are normally based at the Sector Headquarters, and usually have a Chief of Staff.

### SECTOR CHIEF OF FIELD OPERATIONS

All ten Operating Forces Sectors have a Sector Chief of Field Operations, the officer responsible for all field missions and everything else not handled by the Field Station Sector Chief. He is similar to a starship commander, in that both decide who does what and how it will be done. In theory, the Field Station and Field Operations Sector Chiefs have equal authority and responsibility; in practice, the Field Operations Sector Chief makes the final decisions. These officers normally are based at the Sector Headquarters and usually have a Chief of Staff.

### SECTOR CHIEF OF OVERT OPERATIONS

Each of the ten Operating Forces Sectors also has a Sector Chief of Overt Operations. Normally based at the Sector Headquarters, this officer is in charge of all public information, counterintelligence, and unclassified information acquisition duties for his entire sector. This officer's direct superior is the Section Chief of Field Operations.

### SECTOR CHIEF OF COVERT OPERATIONS

Each of the ten Operating Forces Sectors also has one of these. This officer supervises all special equipment distribution, front organizations, informant liaisons, and deep-cover operations for his entire Operating Forces Sector. This officer's direct superior is the Sector Chief of Field Operations. These officers are normally based at their Sector Headquarters.

### SECTOR SECTION HEADS

Each Operating Forces Sector has seven Sector Section Heads, one for each Field Operations Section: Public Information and Affairs, Counterintelligence, Unclassified Information Acquisition, Special Equipment, Informant Liaison, Front Organization, and Deep-Cover Operations. For example, the Sector Counter-Intelligence Head is responsible for all counterintelligence activities in his sector. Sector Section Heads for the first three sections are responsible to the Sector Chief of Overt Operations, and Sector Section Heads for the last four sections are responsible to the Sector Chief of Covert Operations. These officers are normally based at the Sector Headquarters.

### STATION CHIEF

Each Intelligence base has a Station Chief, who is responsible for all activities taking place from his installation. This officer's direct superior is the Sector Chief of Field Stations. These officers are based at their respective stations.

### STATION SECTION HEAD

Each Intelligence base has seven Station Section Heads, though in small bases, the Station Section Head might be the only member of his section. These officers have the same responsibilities as Sector Section Heads, except the authority of a Station Section Head extends only to his own installation. All Station Section Heads are directly responsible to their Station Chief. These officers are stationed at their respective bases.

# SENIOR PERSONNEL

## SELECTED PERSONNEL ROSTER

The list below gives the names, positions, and regular duty stations of numerous Star Fleet Intelligence personnel. If he wishes, the gamemaster may alter these NPCs' duty stations. Officers with an asterisk preceding their name have dossiers in this publication. Refer to **The Mines of Selka** and **The Triangle Campaign** for dossiers on Star Fleet Intelligence agents.

### INTELLIGENCE PERSONNEL

Position	Officer	Location
*Chief of Star Fleet Intelligence	Admiral Dexter O. Armbruster	Star Base 7
ADMINISTRATION DIVISION

## OTHER SENIOR PERSONNEL

The player characters may encounter these NPCs while performing their specific duties. The officers could provide a task force with special instructions, equipment, or even short-duration assistance. The gamemaster should control their participation in an adventure, as they are not intended to serve as regular members of a player character task force.

## ROMULAN SECTOR PERSONNEL

These characters are intended for use as NPCs. The gamemaster may use them as Case Officers, Contact Officers, Briefing Officers, or other advisors. Although many officers serve in Romulan Sector Intelligence, these NPCs are typical of those found within their sector.

## TRIANGLE SECTOR PERSONNEL

The gamemaster should use these NPCs as Case Officers, Contact Officers, Briefing Officers, or other advisors. They are typical of those found within the sector.

# JUDGING CHARACTER GENERATION

## CHOOSING A SHIP

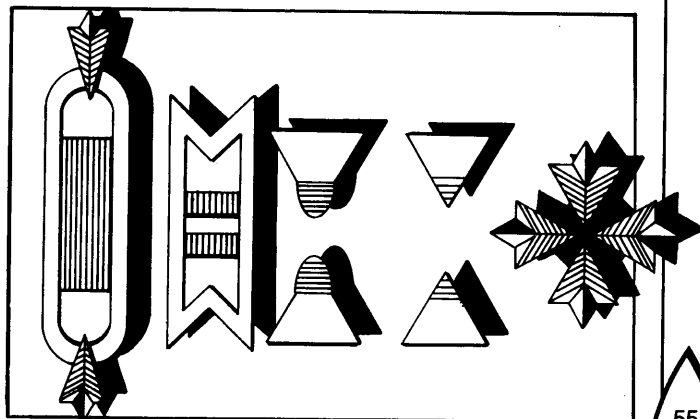

Before the players can create their characters, the gamemaster must decide which type of ship the player characters will be using. Generally, starships used by Intelligence personnel will be small, possibly unarmed, and certainly as inconspicuous as possible. Scouts, *Mission* Class couriers, and small freighters are most often used. If the player characters are not assigned a ship, they will have to arrange for any offworld transportation. The gamemaster must tailor his decision to the adventure or campaign.

Although starships used by Intelligence personnel often have minor modifications, the gamemaster must keep things in context. No matter how often the player characters ask Special Equipment technicians, they should not be allowed to equip their freighter with extensive deflector shields, phasers, or photon torpedoes. A scout is meant to be a scout, and not a cruiser in disguise. Although Intelligence-oriented adventures are somewhat more gadget-oriented than other adventures, Intelligence Command personnel are expected to use deception and their wits, not overwhelming firepower.

On the rare occasions when Star Fleet Intelligence produces specially modified starships, the enhanced vessels are always designated as Model (or Type) Q ships. For example, some Intelligence task groups operate from modified Tavares Class II commercial freighters, which are known as Model Q ships. Though the origin of this practice is obscure, some historians have traced the tradition to 20th-century Terra.

## CHOOSING PLAYER CHARACTER RANKS

Ranks of field agents generally range from Ensign through Captain. As with other Commands within Star Fleet, very few Intelligence Commodores and Admirals serve in the front lines. In most cases, the players' group will not only be the command personnel aboard a starship, they will also be the entire crew. Every member of a task group has a specific purpose to fulfill, regardless of rank. Although rank does have its privileges, it often becomes of secondary importance when a team member's life is directly dependent upon a junior officer.

## CHOOSING PLAYER CHARACTER POSITIONS

There are no fixed orders of importance regarding a character's shipboard position. Clearly, field technicians and monitors should perform reconnaissance missions, terminators and guardsmen should perform security-oriented missions, and document fabricators should probably remain aboard the ship, where they will not get hurt. The character's role in an adventure is determined more by his service branch than his position. However, in small Intelligence task groups, every character may find himself in the fray, whether he intended it or not.

## ASSIGNING CHARACTER SECLARS

The guidelines presented in the **Operating Procedures** section of the **Agent's Orientation Manual** should help gamemasters determine a player character's initial security clearance. Certain circumstances may cause a gamemaster to raise or lower an individual's SECLAR, but such an action should have a logical basis. For example, an officer's SECLAR could be raised if he has an exemplary service record or special technical knowledge relating to an Intelligence research project. On the other hand, his SECLAR could be lowered if he is on probation, or if he has spent his entire career in the Colonial Operations Command or another similarly uninteresting command. Of course, projects exceeding a Mission Group Leader's SECLAR may be revealed on a case-by-case basis, if necessary.

Unless above conditions dictate otherwise, gamemasters should give a SECLAR of 4 to Star Fleet Intelligence officers with the rank of Ensign or Lieutenant, junior grade. Lieutenants and Lieutenant Commanders should have a SECLAR of 5, and Commanders and Captains should have a SECLAR of 6. Finally, most Commodores and Admirals would have a SECLAR of 7, though officers of these ranks should rarely be used as player characters.

## STAR FLEET PERSONNEL SECLARS

The following SECLARs were assigned to crewmembers of the *USS Enterprise* and other well-known Star Fleet personnel. Where two numbers appear, the first number refers to that officer's SECLAR during the *Enterprise's* famous five-year voyage (Stardates 2/0704 through 2/1204), and the second refers to the officer's rating just prior to the vessel's destruction on Stardate 2/2206.25.

### PERSONNEL SECLARs

Chapel, Christine	Ensign: 2	Lt. Commander: 4
Chekov, Pavel A.	Ensign: 2	Commander: 4
DeSalle, Vincent	Lieutenant: 2	
Kirk, James T.	Captain: 5	Admiral: 8
Kyle, Winston	Lieutenant: 2	
M'Benga	Lieutenant: 1	
McCoy, Leonard	Lt. Commander: 4	Commander: 5
Morrow, Randolph E.	Flag Admiral: 8	
Rand, Janice	Ensign: 2	Lt. Commander: 3
Saavik	Lieutenant: 2	
Scott, Montgomery	Lt. Commander: 4	Commander: 5

Stiles, Lawrence	Captain: 5	
Sulu, Hikaru W.	Lieutenant: 3	Commander: 4
Terrell, Clark	Captain: 5	
Uhura	Lieutenant: 3	Commander: 4

## CHOOSING A RACE

Choosing a character's race is more important when playing an intelligence-oriented campaign than with other campaigns. Human field agents will have a distinct advantage over non-Human characters because Humans are more abundant within the Federation and Triangle. If a player selects a race that is not widespread throughout the group's area of operation, the player character might find it difficult to remain inconspicuous.

Another advantage of playing a Human is the potential for disguise. With adequate preparation, a Human could pass as a Vulcan, Andorian, Orion, Tellarite, or even a Klingon or Romulan. A Vulcan could pass as a Romulan, but could not impersonate an Andorian or Tellarite. In particular, Andorians, Tellarites, and Edoans are almost impossible to disguise.

Of course, not all intelligence adventures require this type of subterfuge. Racial advantages in attributes may be more important than physical appearance or anonymity. For example, if the group operates from a starship, certain duty officers may never even perform surveillance or clandestine activities. Nevertheless, the gamemaster should remember that player characters may not enjoy having to remain aboard ship.

## NON-ACADEMY NPC DESIGN

The tables below make quick NPC generation less difficult when situations require an 'instant' encounter. All tables assume Human Attribute Scores. The gamemaster may make the necessary modifications to adjust attributes to any non-Human standard.

### LAW ENFORCEMENT OFFICER (contact)

## SKILL ROLL TARGETS

The information below should help the gamemaster judge the use of new skills.

### ASSASSINATION

This skill is available only as an elective, and so no Star Fleet Intelligence officers receive any initial training. Characters qualified in this skill (Skill Rating of 20 or more) may attempt assassinations. Determine success by making a Skill Roll against the average of the character's Skill Rating in *Assassination* and his INT score. Average the rating with *Security Procedures* when taking security precautions against the possibility of an assassination attempt. The rating may also be averaged with *Personal Weapons Technology* when attempting to operate or repair an unusual assassination device or weapon.

### BRIBERY

Administration officers have a rating of at least 10 in this skill. If a *Bribery* skill roll fails, the authorities (or whoever was not supposed to find out) detect the attempt. This may occur because the bribe was not subtle enough, or the person being bribed proved not to be so corruptible after all, and turned in the character offering the bribe. Successful skill rolls reduce routine 'squeeze' and kickbacks in certain circumstances. If appropriate, average this rating with *Negotiation/Diplomacy* or a character's CHA or INT score.

### CLANDESTINE OPERATIONS

Field Operations officers have a rating of at least 5 in this skill, and Administration officers have a rating of at least 10. A rating of at least 10 implies a general familiarity with clandestine techniques. Characters would gain ratings of 20 only through experience in the field.

Persons with a *Clandestine Operations* rating of 20 or more could maintain a cover identity without suspicion and conceal espionage or other information-gathering activities from normal observers. No skill roll should be required under normal circumstances.

Concealing an identity or activities under unusual circumstances would require a Skill Roll against a character's Skill Rating in *Clandestine Operations*, with any modifiers applied by the gamemaster. Such circumstances would include being under the scrutiny of an already suspicious individual, where particularly dangerous or conspicuous acts must be performed, or when bluffing one's way through a situation requiring talents that one does not possess. If appropriate, the character may average his rating with his INT, DEX, or CHA scores, or his *Negotiation/Diplomacy* skill rating.

### CRYPTOLOGY

Analysis officers have a rating of at least 10 in this skill. When attempting to break a code, a character must average his *Cryptology* skill rating with his INT score. If a character is working on a subspace transmission in an alien language, average his INT score with his *Cryptology* and the appropriate racial language skill rating. If he is attempting to 'read' an alien's body language, average his INT score with either his *Cryptology* or the appropriate racial *Psychology* skill rating, whichever is lower.

Coding and decoding messages are not difficult for characters with professional-level skill. For characters with lower skill ratings, time may be a vital factor. If such a character has access to shipboard or other sophisticated computers, he may make one skill roll to break the code for every twelve hours of study. Modifiers to the skill roll depend on the complexity of the message and the integrity of the code. For example, a simple code used between two merchant captains will probably be easier to crack than one of Star Fleet Command's highest-rated security codes.

### DEMOLITIONS

This skill is available only as an elective, and so no Star Fleet Intelligence officers receive any initial training. Characters with professional-level skill will rarely have problems accomplishing their objectives, and so no skill roll is required. However, less competent characters may achieve undesired effects. Characters with a rating less than 40 should average their DEX score with their *Demolitions* skill rating to determine success when defusing. Average their INT score with their *Demolitions* skill rating to determine success when planting and detonating. If a roll is unsuccessful, a second roll against the character's LUC score would be appropriate, if any chance exists for survival.

### DISGUISE

Field Operations officers have a rating of at least 5 in this skill. Anyone interacting with a character in disguise may make a Saving Roll against his INT score. If the roll is successful, he will notice something amiss in the ability, bearing, or makeup of the disguised person.

Certain racial limitations exist for creating successful disguises. Refer to the **Choosing A Race** section.

### FORGERY

Administration officers have a rating of at least 15 in this skill. Any character with professional-level skill can forge simple printed documents well enough so that they will pass a cursory examination. Special equipment is required to create false ID cards or computer carts. If such equipment is available, roll against the average of *Forgery* and either *Electronics Technology* or *Computer Technology* to create a false ID card. Roll against the average of *Forgery* and either *Computer Technology* or *Communication Systems Technology* to create a false voiceprint computer cart.

If a person carefully examines a forged printed document, have him make a skill roll against the average of his *Forgery* rating and INT score. If successful, he will notice that something is strange, and he may further investigate the document. A forger can check his own printed work for possible flaws by making a *Forgery* skill roll. This does not guarantee that the forgery will stand up to an investigation, but it does allow a forger to judge his own work. Detection and evaluation of falsified ID cards and computer carts require a ship's computer or special detection equipment.

## INTELLIGENCE PROCEDURES

Analysis and Technical Services officers have a rating of at least 5 in this skill, and Field Operations officers have a rating of at least 10. A successful skill roll indicates that the character was able to accomplish a desired task according to proper Star Fleet Intelligence procedures. An unsuccessful roll indicates failure, with the gamemaster judging exact specifics resulting from failure. Averaging the rating with the character's INT, DEX, or LUC score may be appropriate in some situations.

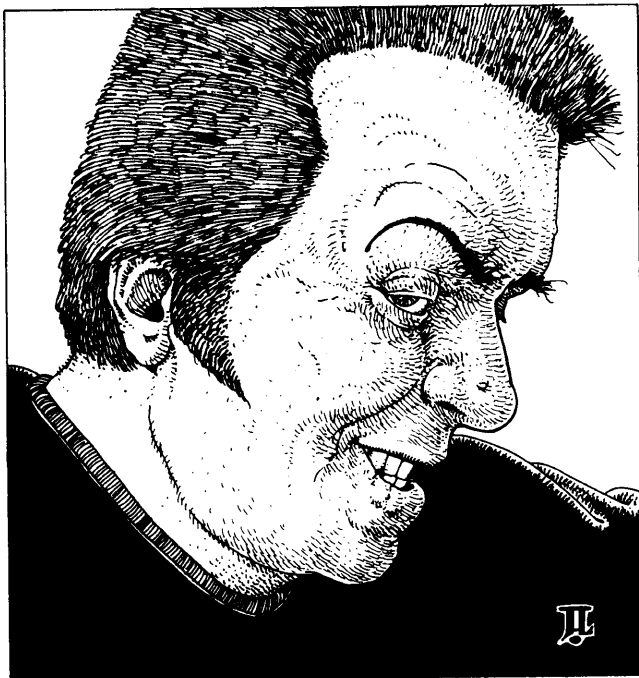

## INTERROGATION

Administration officers have a rating of at least 15 in this skill. If an interrogator fails his skill roll, the interrogation attempt is completely unsuccessful. If the skill roll is successful, the victim can then make a Saving Roll against his INT score (if the interrogator is using trickery) or his END score (if duress or torture is used). If his roll is successful, the victim reveals no information. If unsuccessful, the interrogator gets a significant piece of knowledge.

If the interrogator uses torture, it is possible that the victim may die before giving up any secrets. If the victim fails his Saving Roll against his END score by more than 20 points, he passes out, taking 2D10 points of wound damage in the process. The victim may be immediately revived (if the damage did not kill him), but the interrogator will gain no information, and he must make another skill roll, repeating the above process.

2D100 minus the interrogator's *Interrogation* skill rating minutes of interrogation inflicts 1D10 points damage on the victim, regardless of the outcome. If tortured, the victim receives wound damage. If trickery is used, the damage is temporary. Thus, a victim's CURR OP END continues to drop under torture, making it all the more likely that he will pass out or die under duress before talking. It is possible to administer medical aid to raise the victim's CURR OP END before continuing torture.

Vulcans possess mental techniques to ignore pain. Thus, it is extremely difficult (if not impossible) to torture information out of a Vulcan.

## MINING

This skill is available only as an elective, and so no Star Fleet Intelligence officers have any initial training. A rating of at least 10 implies a general familiarity with mining techniques. Characters can gain ratings of 20 or more only through experience as a miner or mine engineer. Intelligence agents use this skill primarily as part of a cover identity, as miners have access to many disreputable characters, underground passageways, explosives, as well as rumors of possible interest.

## MEDICAL SCIENCE, PHARMACOLOGY

This skill is an additional *Medical Science* selection, available only as an elective, and so Star Fleet Intelligence officers receive no initial training. It also may be selected by any Medical Officers, regardless of whether or not they are Intelligence Command transferees.

## PHYSICAL SCIENCE, DRAFTING

This skill is an additional *Physical Science* selection, available to Technical Services officers as a branch skill, or to other Intelligence officers as an elective. Other Star Fleet officers may select this skill as a possible branch skill or elective.

Illustrations drawn hastily or by minimally skilled individuals may contain inaccuracies or misinformation. The gamemaster should determine the effects of failed skill rolls.

## PHYSICAL SCIENCE, GRAVITICS

This skill is an additional *Physical Science* selection, available to Technical Services officers as a branch skill, or to other Intelligence officers as an elective. Other Star Fleet officers may select this skill as a possible branch skill or elective.

## PHYSICAL SCIENCE, METALLURGY

This *Physical Science* skill is available to Technical Services officers as a branch skill, or to other Intelligence officers as an elective. Other Star Fleet officers may choose *Metallurgy* as a possible branch skill or elective.

### SMALL VESSEL ENGINEERING

Analysis and Technical Services officers have a rating of at least 5 in this skill. Ratings in this skill are halved (rounded down) when applied to situations requiring skill in *Space Science*, *Astronautics*, and vice versa.

Class 1 starships (up to 5000 metric tons) are considered to be small vessels for this purpose. Characters may use this skill to effect repairs on Class II starships (5000 to 15,000 metric tons), but a -20 modifier is applied to such skill rolls. Larger starships of over 15,000 metric tons are considered to be large vessels.

### SMALL VESSEL PILOTING

Analysis officers have a rating of at least 15 in this skill. Ratings in this skill are reduced to one-quarter (rounded down) when applied to situations calling for *Starship Helm Operation* or *Space Science*, *Astrogation*. The sum of the character's ratings in *Starship Helm Operation* and *Space Science*, *Astrogation* are reduced to one-quarter (rounded down) when applied to situations calling for *Small Vessel Piloting*.

Class I starships (up to 5000 metric tons) are considered to be small vessels for this purpose. Characters may pilot Class II starships (5000 to 15,000 metric tons) using this skill, but a -20 modifier is applied to such skill rolls. Larger starships of over 15,000 metric tons are considered to be large vessels.

### STEALTH

Field Operations officers have a rating of at least 10 in this skill. The average of this rating and the character's DEX or LUC score may be used to evade pursuers or to sneak unnoticed past guards.

### SURVEILLANCE

Field Operations officers have a rating of at least 5 in this skill, and Administration officers have a rating of at least 20. The average of this rating and the character's DEX or LUC score may be used to remain inconspicuous in an appropriate setting. The average of this rating and the character's INT score may be used to recall a very minor (yet significant) detail made during an observation.

### TRADE AND COMMERCE

Analysis officers have a rating of at least 5 in this skill, Field Operations officers have a rating of at least 10, and Administration officers have a rating of at least 20. Successful Skill Rolls against a character's *Trade and Commerce* Skill Rating improve the prices obtained for goods, or the amount of those goods that can be sold at a fixed price. Intelligence agents use this skill primarily as part of a cover identity, as traders often see and hear things that others miss.

### VALUE ESTIMATION

Analysis officers have a rating of at least 5 in this skill, Field Operations officers have a rating of at least 10, and Administration officers have a rating of at least 15. A successful skill roll will give a relative estimate of the item's worth only (not an exact value). This skill (not *Forgery*) should be used when evaluating a counterfeit work of art. Intelligence agents use this skill primarily as part of a cover identity.

# JUDGING OPERATING PROCEDURES

## SELECTING MISSION CLASSIFICATIONS

The **Operating Procedures** section of the **Agent's Orientation Sourcebook** describes how Star Fleet Intelligence missions are categorized. Those guidelines should help the gamemaster decide which types of missions are appropriate for his group or campaign. Some assignments will require two classifications.

Mission classifications give the group an idea of the skills needed for the mission and give the gamemaster an idea of the equipment needed. Assign additional NPCs possessing useful skills to the group if the player characters do not have the skills required. In addition, the gamemaster should decide on the mission equipment long before the group begins clamoring for more gadgets than a freighter could carry.

## ASSIGNING MISSION SECLARS

The gamemaster may have to fight two impulses: the desire to send a low-SECLAR group on a high-SECLAR mission, and the desire to over-classify (or under-classify, depending on his style) every mission. Star Fleet Intelligence officers each have their SECLARs, which are assigned with good reason. Though it might work for one or two encounters, the gamemaster should not have underlings repeatedly sticking their noses into security matters far over their heads. This tactic can easily kill off the group. Instead, the player characters should be assigned to missions that reflect their current clearance. Not every mission should threaten the universe, and few missions should have extremely high or low SECLARs. The intrigue of the action itself should be the lure, and not the mission's unusual importance in the scope of things. For this reason, more than half a typical task group's missions should be classified Secret. Missions with a SECLAR of less than 4 or more than 5 are rare. For example, the super-hush-hush Project Genesis has a SECLAR of 7. Even General Order Number Seven (referring to Talos IV) in the *Star Trek* episode "The Menagerie" has only a SECLAR of 6. Creating a mission that justifies a SECLAR of 8 or 9 would be nearly impossible.

## SELECTING TASK FORCE COMPOSITIONS

Unless the gamemaster wishes to provide pre-generated player characters that will fill the mission's needs, the players should follow their instincts and create characters that they think will be useful. The gamemaster may have other ideas about which skills are necessary for a particular mission, and so he may add one or two NPCs to the player group temporarily. A gamemaster should not penalize his group and allow them to die just because they chose the wrong skills. By the same token, reinforcements are not often allowed, and so any additions to the task force should come before the group ever gets off the ground. Above all, remember that Intelligence missions are not supposed to be suicidal. In most cases, there can be turning back once the action gets underway.

## MAKING PRE-MISSION PREPARATIONS

After the players have generated their characters, they should be briefed on their assignment. Player characters with prior service experience in the sector should have some relevant information on local conditions. Refer to the **Judging Equipment** chapter for hints on determining the type and amount of equipment allowed on a mission.

## BRIEFINGS PREPARATION

The gamemaster must prepare appropriate Intelligence briefings for his group. Depending on the amount of time and the detail desired, these briefings could range from a paragraph to several pages or more of complex notes.

There are two important factors to remember. First of all, because he wants the group to have the best possible chance for success, the Case Officer should tell them everything that Star Fleet Intelligence knows on the subject in question. This means that the gamemaster must have an even firmer grip on the elements of an Intelligence-oriented adventure than with other mainstream adventures. It is extremely difficult to 'wing' this kind of adventure.

Secondly, although the player characters' briefings should be as complete as possible, even Star Fleet Command does not know everything. After all, if Star Fleet knew everything about the subject, the players' group would not even be needed. Therefore, a briefing may contain some inaccuracies, some outdated information, and so on.

## THE CONTACTS LIST

The player characters should receive Star Fleet Intelligence Informant Forms providing them with data on the contacts they may meet. The Contact Officer should present this information to them during a pre-mission briefing, rather than after the mission begins (unless not having any prearranged contacts is an integral part of the adventure itself). The gamemaster should spend as much time as necessary to create interesting, yet somewhat logical, contact locations for his informants. Rendezvous may take place anywhere on a planet's surface, or even in an orbiting space station, vessel, or asteroid belt. Adapt ideas from conventional spy fiction—the added excitement of inter-planetary travel will give any such rendezvous a new dimension. In fact, just getting to a rendezvous point may be an adventure in itself. Finally, the gamemaster will also have to decide when a contact has been overused and is no longer effective.

## ESCAPE ROUTES AND EVASIVE TACTICS

The Case Officer should encourage the group to make some specific plans in case their mission becomes a disaster. With proper planning, the effects of many unpleasant circumstances could be decreased or eliminated. They should ask themselves the following questions before the answers become critically important: "Where is the nearest front organization office or other safehouse?", "Where can we rendezvous if we get separated?", and "How can we arrange for alternate offworld transportation without breaking our covers?"

## OPERATING PROCEDURES AND PROTOCOLS

Star Fleet Intelligence Command operating procedures and communications protocols are helpful, but neither are perfect or all-inclusive. The gamemaster may make modifications as circumstances warrant. Different Operating Forces sectors may have different guidelines on specific procedures, and each sector may be more or less strict than the other sectors. For example, Sector 1 agents may be permitted to be taken prisoner, but that is absolutely forbidden for Tholian Sector agents. Other variations are possible at the gamemaster's discretion. Also, the gamemaster should encourage the players to create and use code words and phrases during play. These are some of the little things that give gaming sessions 'flavor'.

## POST-MISSION DEBRIEFINGS

These may be as formal or informal as the situation requires. Obviously, if task group members are returning for court-martial, then the tone should be somewhat more harsh than if they are being welcomed as heroes. In a sense, debriefings provide the players with an opportunity to evaluate the gamemaster, and vice versa. After everyone has had his say, awards and decorations may be bestowed, worthy promotions may be authorized, and the group can begin preparing for their next assignment. An agent's SECLAR may be increased at this time, but this is a rare occurrence. After prolonged play, player characters will work up to handling the most sensitive intelligence assignments.

## WHEN THINGS GO AWRY

The mission was a comedy of errors, the group suffered heavy casualties, and the Mission Group Leader faces a life sentence for his group's conduct. One of the problems with an Intelligence-oriented adventure or campaign is that the group may not be able to blame a starship's lack of speed or some other hardware failure for their mistakes. Missing a vital rendezvous or believing an enemy to be a friend can seal a task group's doom. Below are probably causes and remedies for such situations.

1. The gamemaster may be at fault for placing the group in a no-win situation. If that happens and everyone gets wiped out, the best thing to do is to start again from scratch and try to avoid similar problems in the future.

2. The group may not be used to thinking in spy-oriented fashion. In this case, the gamemaster can give them some helpful advice through an NPC or have them make skill rolls in *Intelligence Procedures*, with success reminding a player character how to handle a particular situation.

3. The group may not have enough gadgets to be successful. This can be adjusted on a mission-by-mission basis, provided there are any player characters remaining. Players sometimes resent being under-equipped and take their hostilities out on the gamemaster.

4. The group may have too much equipment and be threatening to start interstellar war with their sledgehammer tactics. This is a particularly touchy situation, and the gamemaster may have to cut off their equipment allowance. Even Star Fleet Intelligence officers have to abide by General Order Number One (or at least give it lip service). If the players must break regulations in the course of their duties, they ought to learn to be subtle when doing so. Any Intelligence task group that vaporizes a city block with a phaser bore is definitely not acting subtly.

# JUDGING EQUIPMENT

At the gamemaster's discretion, either each member of the group or the group as a whole may make percentile rolls to determine whether or not they will receive certain equipment. Apply a +10 bonus modifier to specific categories of equipment listed as especially useful in the **Mission Classifications** section of **Operating Procedures** in the **Agent's Orientation Sourcebook**, and apply a -10 penalty modifier to equipment categories that are discouraged for the group's category of mission.

Intelligence agents assigned to Gorn, Klingon, Orion, Romulan, or Triangle Sectors receive a +10 modifier for some non-Federation equipment rolls. For example, Intelligence agents from Klingon Sector Intelligence add 10 to their percentile roll only for Klingon equipment. For these equipment rolls, Triangle Sector Intelligence is considered part of Klingon, Orion, and Romulan Sectors. This bonus modifier does not apply to Star Fleet equipment.

Player characters may also attempt to persuade Special Equipment officers to make specially designed devices or to provide equipment that is otherwise unavailable (such as when their equipment roll fails). Allow a player character to make a Skill Roll against the average of his *Negotiation/Diplomacy* rating and his INT score to receive the equipment. Modify the roll according to the persuasiveness and logic of the character's arguments. In addition, the gamemaster should consider the character's or group's reputation. If the group destroys special gadgets every time they field-test them, the player characters will likely get a hostile response when seeking favors from Special Equipment officers. Apply bonus or penalty modifiers to reflect this reputation as well. If the group's skill roll is successful, the supply officer will provide the equipment or some percentage of it, though grudgingly and with some grumbling.

Unless presented here, judge the availability of non-Federation equipment the same way as that of comparable Star Fleet equipment.

## PERSONAL EQUIPMENT

### ACCESS EQUIPMENT

#### Sonic Lock Deactivator

Availability: 35 percent per group member. With this device, lock deactivation usually takes 10 to 20 seconds.

#### Mechanical Lockpicking Set

Availability: 15 percent per group member. A successful attempt usually takes 30 to 60 seconds.

#### Precision Microwelder

Availability: 20 percent per group member.

#### Orientine Acid

Availability: 35 percent per group member. Applied through a special spray applicator, this chemical will dissolve standard-thickness glasilica in less than one minute.

#### Grapnel Projector

Projector availability: 20 percent per group member.

Grapnel (set of 12) availability: 35 percent per group member.

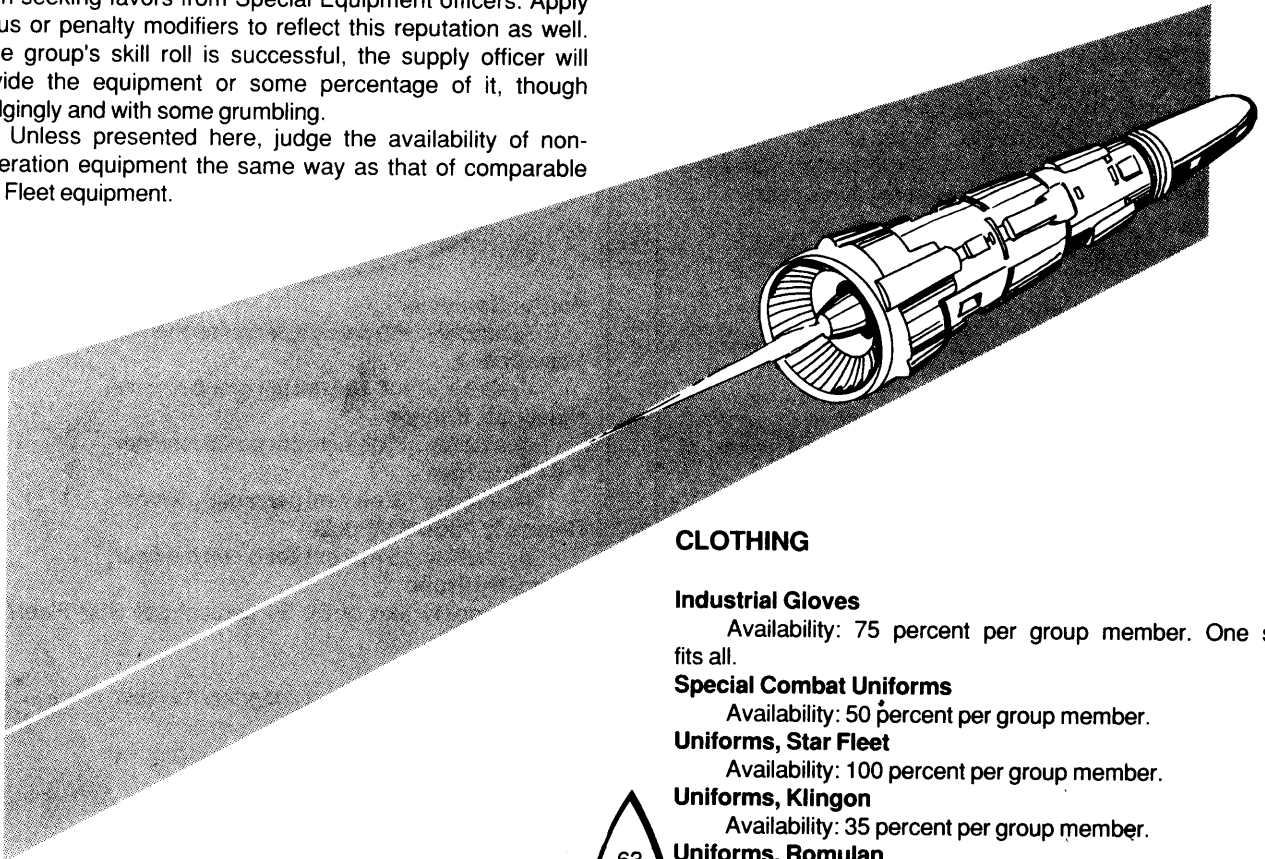

Piton (set of 20) availability: 20 percent per group member.

#### Monofilament Solvent

Availability: 20 percent per group member.

#### Phaser Cutting Torch

Availability: 5 percent per group member.

### CLOTHING

#### Industrial Gloves

Availability: 75 percent per group member. One size fits all.

#### Special Combat Uniforms

Availability: 50 percent per group member.

#### Uniforms, Star Fleet

Availability: 100 percent per group member.

#### Uniforms, Klingon

Availability: 35 percent per group member.

#### Uniforms, Romulan

Availability: 20 percent per group member.

## COMMUNICATION AND EW EQUIPMENT

### Personal Amplifier

Availability: 15 percent per group member.

### Auditory Filter

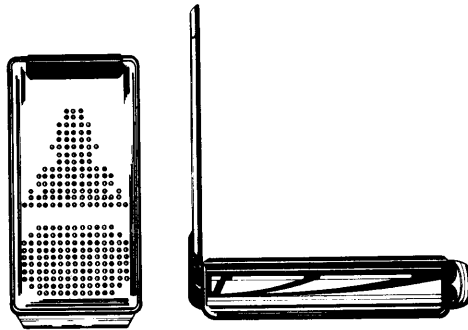

Availability: 35 percent per group member.

### Communicator Booster

Availability: 15 percent per group member.

### Communicator, Flip-Grid

Availability: 100 percent per group member.

### Communicator, Klingon

Availability: 20 percent per group member.

### Communicator, Pocket

Availability: 100 percent per group member.

### Communicator, Recording

Availability: 50 percent per group member.

### Communicator, Romulan

Availability: 10 percent per group member.

### Communicator, Wrist

Availability: 75 percent per group member.

### Earpiece Receiver

Availability: 100 percent per group member.

### Earpiece Receiver, Romulan

Availability: 5 percent per group member.

### Frequency Spectrum Generator

Availability: 35 percent per group member.

This device's effect can also be created by rewiring a shipboard communications panel. To do so requires three successful Skill Rolls against *Communication Systems Technology*. One attempt is permitted every 20 minutes.

### Long-Range Directional Microphone

Availability: 50 percent per group member.

### Oral Transceiver

Availability: 20 percent per group member.

### Sensceiver Implant

Availability: 10 percent per group member.

### Subcutaneous Transponder

Availability: 50 percent per group member.

This device will be rendered useless if 10 points of damage are inflicted on the area where it is inserted.

### Collar Translator

Availability: 20 percent per group member.

### Electronics Warfare Tricorder

Availability: 35 percent per group member.

### Universal Translator

Availability: 75 percent per group member.

There is a 30 percent chance that new languages will be translated immediately. This chance increases by 10 percent for each half-hour of conversation that the device records or is fed in advance. The percentile chance decreases by 10 percent if the language is spoken by a non-humanoid species.

### Universal Translator, Klingon

Availability: 15 percent per group member.

## DATA COLLECTION AND MANAGEMENT EQUIPMENT

### Camera, Film

Camera and film availability: 100 percent per group member.

### Camera, Holographic

Camera and film availability: 100 percent per group member.

### Computer Carts

Availability: 100 percent per group member.

### Computer Cart, Klingon

Availability (set of 6): 50 percent per group member.

### Portable Cart Viewer

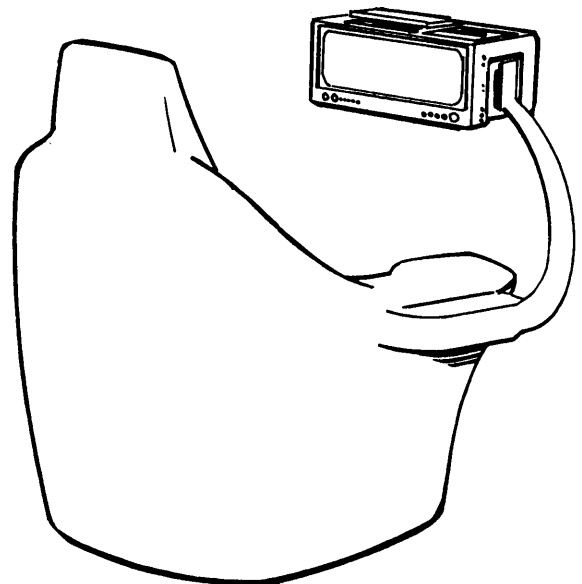

Availability: 75 percent per group member.

The cart viewer's camera/recording attachment has a 50 percent availability per group member.

### Personal Computer

Availability: 100 percent per group member.

The personal computer's cart viewer module has a 75 percent availability per group member. Both the communications and the transactor module have a 50 percent availability per group member.

### Pocket Computer

Availability: 100 percent per group member.

### Holocube

Availability: 100 percent per group member.

### Holocube, Klingon

Availability: 35 percent per group member.

### Data Recorder

Availability: 50 percent per group member.

### Remotely Piloted Vehicle

Availability: 15 percent per group member.

### Telemetry Probe

Availability (set of 3): 35 percent per Star Fleet Intelligence starship.

### Tricorder, Military

Availability: 20 percent per group member.

### Tricorder, Standard Sciences

Availability: 100 percent per group member.

### Improved Standard Sciences Tricorder

Availability: 75 percent per group member.

### Directional Sciences Tricorder

Availability: 75 percent per group member.

## SCIENCE TRICORDER ABILITIES AND RANGES

Scan Type	Information Obtained	Ranges		
		Directional	Standard, Improved	Standard
Energy sources				
General	Direction, distance	1500	1200	1000
Specific	Identification of type	200	175	100
Physical Composition				
General	Direction, distance	1500	1200	1000
Specific	General composition	200	175	100
Determinative	Complete chemical composition	15	15	1.5
Life Forms				
General	Presence	1000	700	500
Specific	Number and type	250	150	100

### Tricorder, Klingon

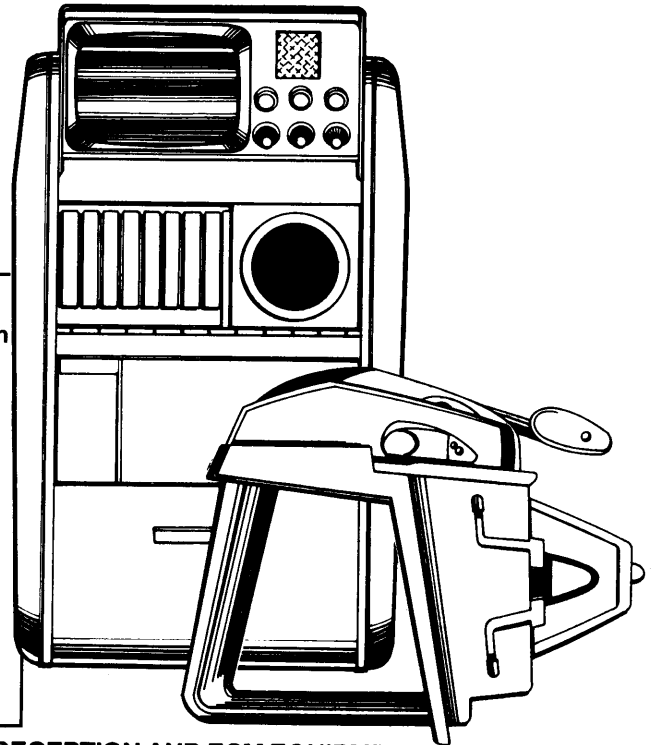

Availability: 5 percent per group member.

For all intents and purposes, treat Klingon tricorders as Federation tricorders.

### Image Recorder/Processor, Romulan

Availability: 35 percent per group.

The user of this device must state what type of scan he is making and in what direction. A single scan covers a 90° arc in ten seconds.

## RECORDER/PROCESSOR ABILITIES

Scan	Type	Information Range
Energy Source		
General	Direction, distance	750
Specific	Identification of type	80
Determinative	Level of output	5
Physical Composition		
General	Direction, distance	750
Specific	General composition	80
Determinative	Complete chemical composition	1.5
Life Forms		
General	Presence	400
Specific	Number and type	80
Determinative	Biological data	1.5

### Battle Computer, Klingon

Availability: 20 percent per group member.

When engaged with a tricorder tied into a ship's computers, this device can track and target enemy troops in an area up to 500 meters. Whenever individuals engage in armed combat against enemy personnel within this radius, using the battle computer increases all *Marksmanship*, *Modern* ratings by 10.

### Portable Computer/Recorder, Klingon

Availability: 35 percent per group.

### Electronic Diary, Klingon

Availability: 5 percent per group member.

In theory, it is possible to feed information into this device from a specially modified Federation communications panel.

### Instructional Machine, Klingon

Availability: 2 percent per group.

### Microrecorder Data Tape, Orion

Availability: 75 percent per group.

## DECEPTION AND ECM EQUIPMENT

### Anti-Laser Aerosol

Availability (case of 6): 15 percent per group member.

The aerosol takes ten seconds to reach maximum effect. Any modern weapons fired through the aerosol have a -15 To-Hit modifier, and damage inflicted by any phaser, laser, or plasma sidearm is decreased by 20 percent (rounded down).

### Combat Simulator

Availability: 20 percent per group member.

### Disguise Kits

Availability of each kit: 50 percent per qualified group member, according to race. A Skill Rating of at least 10 in *Disguise* is required to use a kit. For each major encounter, the gamemaster should make a Skill Roll against the disguised character's *Disguise* rating. Bonus modifiers include the intelligence of the person disguised (one-quarter of his INT score, rounded down). Penalty modifiers include the degree of contact (ranging from no penalty for cursory inspection up to -30 for careful visual examination) and the intelligence of the person being deceived (one-quarter of his INT score, rounded down). A successful skill roll means that the disguised character was not uncovered, and therefore is believed to be who he appears to be.

### Energy Surge Inducer Kit

Availability: 35 percent per group member.

The explosion will cause 100 points of structural damage and inflict 50 points of wound damage to anyone within 3 meters.

### ID Forgery Unit

Availability: 50 percent per group.

### Secure Communications Module

Availability: 15 percent per group member.

### Adhesive Plasticene Tape

Availability: 100 percent per group member.

A character must make a Skill Roll against the average of his *Security Procedures* Skill Rating and his INT score to detect use of the tape, upon cursory examination.

### Voice Synthesizer

Availability: 50 percent per group member.

Any shipboard or ground-based computer can determine whether a synthesized voice recording is legitimate or fake, provided real samples are available.

### Pocket Scrambler, Klingon

Availability: 20 percent per group member.

Anyone attempting to monitor conversations within ten meters of a pocket scrambler must make two Skill Rolls against his rating in *Security Procedures* to penetrate the scrambler's effects.

## ELECTRONIC EQUIPMENT

### Hand Calculator

Availability: 100 percent per group member.

### Portable Encoder/Decoder

Availability: 50 percent per group.

### Radiation Detector

Availability: 75 percent per group member.

### Stress/Accuracy Detector

Availability: 75 percent per group.

This device is accurate 99 percent of the time.

### Synchronic Meter

Availability: 35 percent per group.

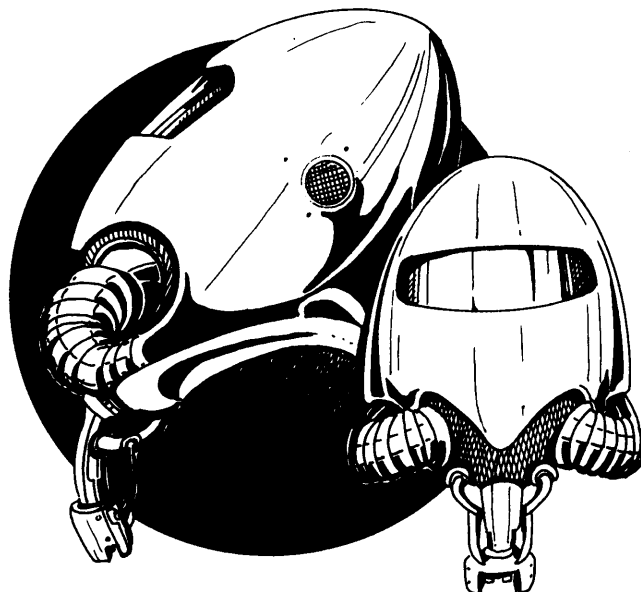

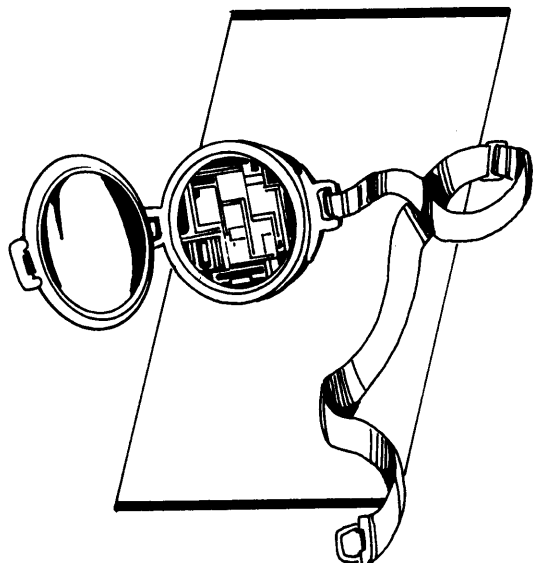

### UV Wave Sterilizer

Availability: 35 percent per group.

Ten minutes of exposure without goggles will cause significant eye damage. After the first half-hour, other tissue damage will occur at the rate of 1D10 points of damage per half-hour.

### Vibrotools

Availability: 100 percent per group member.

## ENVIRONMENT SURVIVAL EQUIPMENT

Availability for all Star Fleet environment survival equipment: 100 percent (for reasonable quantities).

### Standard Environmental Suit, Klingon

Availability: 15 percent per group member.

### Deluxe Environmental Suit, Klingon

Availability: 5 percent per group member.

### Standard Environmental Suit, Romulan

Availability: 10 percent per group member.

### Life Support Mask, Klingon

Availability: 20 percent per group member.

## KITS AND POWERPLANTS

### Standard Small-Equipment Energy Cell

Availability: 100 percent (for reasonable quantities).

### High-Output Small-Equipment Energy Cell

Availability: 100 percent (for reasonable quantities).

### Small-Equipment Energy Cell, Klingon

Availability: 75 percent (for reasonable quantities).

### Small-Equipment Energy Cell, Romulan

Availability: 50 percent (for reasonable quantities).

### Carpentry Kit

Availability: 50 percent per group.

### Metalworking Kit

Availability: 75 percent per group.

### Specialized Kits

Availability of each kit: 75 percent per group.

The kit's bonus modifier is +10 if the character using it has a corresponding skill rating of less than 40.

### Portable Power Supply

Availability: 15 percent per group member.

### Portable Power Supply, Romulan

Availability: 20 percent per group.

### Portable On-Site Fusion Reactor

Availability: 35 percent per group.

### Personal Survival Kit

Availability: 100 percent per group member.

### Personal Survival Kit, Klingon

Availability: 75 percent per group member.

### Personal Survival Kit, Romulan

Availability: 50 percent per group member.

## LOCATION/DETECTION EQUIPMENT

### Computerguide Electronic Map

Availability: 15 percent per group member on Federation worlds.

10 percent per group member on neutral worlds.

2 percent per group member for unfriendly worlds.

### Inertial Locator

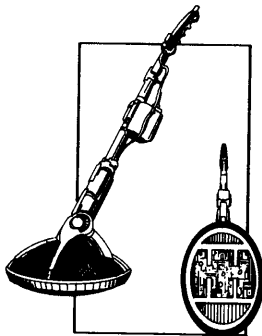

Availability: 50 percent per group member.

### Magnetic Compass

Availability: 100 percent per group member.

### Metal Detector

Availability: 35 percent per group member.

### Personal Signalling Beacon, Klingon

Availability: 75 percent per group member.

### Electronic Tracer/Transducer Set

Availability: 50 percent per group member.

### Electronic Tracer/Transducer Set, Klingon

Availability: 15 percent per group member.

## MECHANICAL EQUIPMENT

Availability of hand tools: 100 percent per group member.

## MISCELLANEOUS EQUIPMENT AND PROVISIONS

Availability of miscellaneous Federation equipment and provisions: 100 percent per group member.

### ID Card, Klingon

Availability: 5 percent per group member.

### ID Card, Romulan

Availability: 2 percent per group member.

### Emergency Packaged Rations, Klingon

Availability (in 10 person/day quantities): 20 percent per group member.

### Emergency Package Rations, Romulan

Availability (in 10 person/day quantities): 5 percent per group member.

## PERSONAL SECURITY SYSTEMS

### Standard Briefcase

Availability: 100 percent per group member.

### Deluxe Security System Briefcase

Availability: 35 percent group member.

### Security-Encoded Data Cart

Availability: As needed.

### Personal Document Incinerator

Availability: 100 percent per group member.

### Security Document Binder

Availability: As needed.

### Electronic Sensorcord

Availability of any desired length: 35 percent per group member.

## SENSORY ENHANCEMENT EQUIPMENT

### Belt Light

Availability: 75 percent per group member.

### Binoculars, Standard

Availability: 100 percent per group member.

### Binoculars, Target

Availability: 50 percent per group member.

### Rocket Flare

Availability (set of 6): 100 percent per group member.

### Coldlight Glowstick

Availability (set of 10): 100 percent per group member.

### Infrared Goggles

Availability: 50 percent per group member.

### Aqualantern

Availability: 75 percent per group member.

### Aqualantern, Klingon

Availability: 15 percent per group member.

### Lantern, Coldlight

Availability: 75 percent per group member.

### Lantern, Liquid Fuel

Availability: 75 percent per group member.

### Lantern, Pocket

Availability: 100 percent per group member.

### Lantern, Pocket (Klingon)

Availability: 20 percent per group member.

### Lantern, Time-Delay

Availability: 75 percent per group member.

### Infrared Lenskits

Availability: 75 percent per group member.

### Light Enhancing Viewer

Availability: 75 percent per group member.

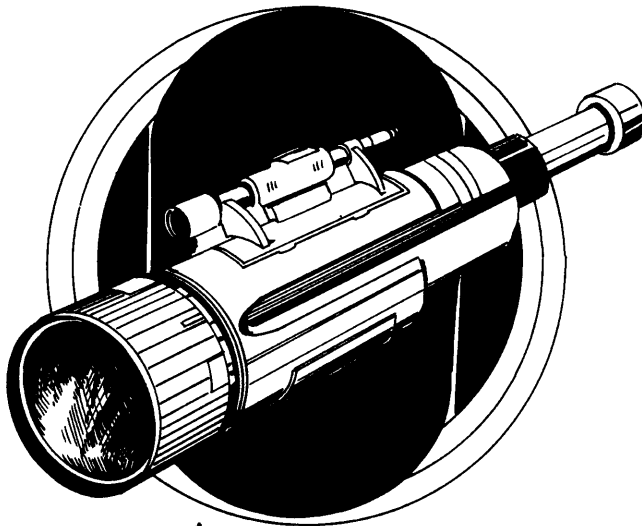

### Laser/Signal Mirror

Availability: 35 percent per group member.

There is a 25 percent chance that a laser hitting a mirror will shatter it. Any phaser set to disrupt will automatically shatter a mirror, even if it is only a graze. The disintegrate setting will destroy the entire mirror.

### Surveillance Scope

Availability: 50 percent per group member.

### Torch, Gyroscopic

Availability: 100 percent per group member.

### Torch, Hand

Availability: 100 percent per group member.

As a weapon, this will cause 2D10 + 5 points of heat damage per combat round. Otherwise, treat as a club.

## SHELTERS AND ACCESSORIES

### Backpack

Availability: 100 percent per group member.

### Sleeping Bag

Availability: 100 percent per group member.

### Tarpaulin, Standard

Availability: 100 percent per group member.

### Tarpaulin, Thermal

Availability: 75 percent per group member.

### Tent, Conventional

Availability: 100 percent per group member.

### Tent, Pressure

Availability: 75 percent per group member.

The air processing unit is available upon request.

## PERSONAL TRANSPORTATION DEVICES

### Personal Aerial Descent System

Availability: 35 percent per group member with a DEX score of 65 or more.

To survive a PADS landing, a character must make a successful Saving Roll against the average of his DEX and LUC scores. He may add half his average in *Vehicle Operation*, *Atmospheric* and *Small Equipment Systems Operation* to the To-Hit Number. If the roll is unsuccessful by 20 points or more, the character has been killed on impact. If the roll is unsuccessful by a lesser margin, the character suffers injuries amounting to the difference between his To-Hit Number and his resulting die roll.

### PADS Ablative Shield

Availability: As needed, in conjunction with the PADS.

When used in a low-orbital deployment, use the normal method for determining landing survival, but add a -15 penalty modifier to the Saving Roll.

### A-Grav Carrier

Availability: 100 percent per group member.

### A-Grav Platform

Availability: 100 percent per group member.

### Portable Antigrav

Availability: 100 percent per group member.

### Portable Antigrav, Klingon

Availability: 35 percent per group.

### Portable Antigrav, Romulan

Availability: 35 percent per group.

### Grav Belt

Availability: 50 percent per group member.

### Special-Purpose Gravitic Load-Carrying Device

Availability: 15 percent per group member.

### Snow Ski Set

Availability: 100 percent per group member.

## LAND TRANSPORTATION DEVICES

Any of these vehicles may be customized, at the group's request. The gamemaster must determine how each modification affects overall performance.

### Model L "Tunnel Runner" Mining Vehicle

Availability: Only in appropriate locations.

### Model S3 "Sizzle Bug" Mining Vehicle

Availability: Only in appropriate locations.

### Shuttlecrawler

Availability: 20 percent per starship's normal shuttlecraft capacity.

### Model GP-12 All-Terrain Vehicle, Klingon

Availability: 5 percent per group.

### Model GP-6 Utility Van, Klingon

Availability: 15 percent per group.

### Shuttle Dolly, Romulan

Availability: 2 percent per group.

### Rough Terrain Vehicle, Orion

Availability: 20 percent per group.

## WATER TRANSPORTATION DEVICES

Availability: Gamemaster's discretion.

Any of these vehicles may be customized, at the group's request. The gamemaster must determine how each modification affects overall performance.

## AIR TRANSPORTATION DEVICES

Availability: Gamemaster's discretion.

Any of these vehicles may be customized, at the group's request. The gamemaster must determine how each modification affects overall performance.

## SPACE TRANSPORTATION DEVICES

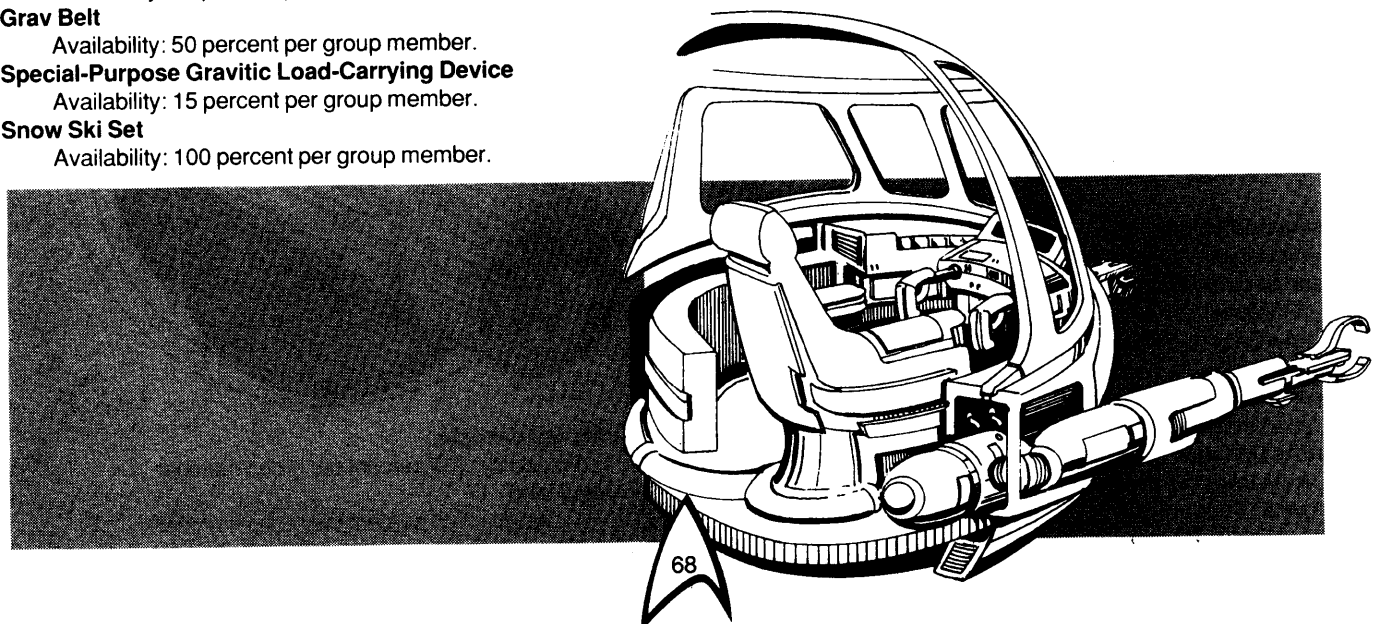

### Shuttlecraft

Availability: Gamemaster's discretion.

Star Fleet Intelligence Command does have a small collection of non-Federation shuttlecraft available. Their use would be restricted to situations where such vehicles are vital to the mission.

### Single-Seat Repair Bug

Availability: 25 percent per starship's normal shuttlecraft capacity.

## MEDICAL EQUIPMENT

### FEDERATION

All Federation medical equipment is available at the request of a Medical Officer with a minimum skill rating of 40 in *General Medicine*.

#### Portable Anesthetic Field Generator

A skill rating of at least 20 in *General Medicine* is required for use.

#### Auralite

Skill ratings of at least 40 in *General Medicine* and 40 in *Surgery* are required for use.

#### Biocomputer

A skill rating of at least 20 in *General Medicine* is required for use.

#### Cardiostimulator

To revive a character reduced to zero MAX OP END or less through some kind of heart failure or shock (like electric shock), someone with a skill rating of at least 20 in *General Medicine* must use this unit on him. Because the device is used in emergency situations, a successful skill roll is required to use it.

#### Diagnostic Table And Panel

Anyone with a skill rating of 10 in *General Medicine* can take the readings from the panel's scales, but only someone with a skill rating of 20 or more will be able to tell very much from them.

#### DNA Code Analyzer

A skill rating of at least 40 in either *Genetics* or *General Medicine* is required for use.

#### Endocrine Monitor

A skill rating of at least 40 in either *Exobiology*, *General Medicine* or *Pathology* is required for use.

#### Enzyme Recorder

A skill rating of at least 40 in either *Exobiology*, *General Medicine* or *Pathology* is required for use.

#### Heartbeat Reader

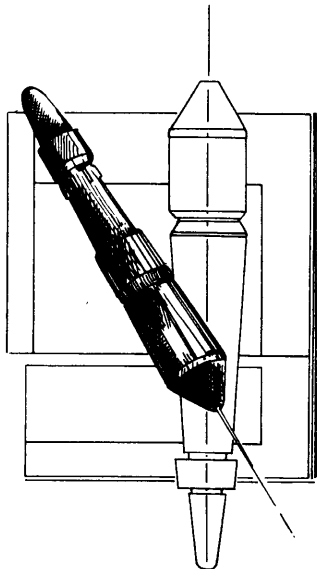

A skill rating of at least 20 in *General Medicine* is required for use.

#### Hypo

Anyone with a skill rating of 10 or more in *General Medicine* can fill one, and anyone who is shown how to handle it can give an injection under normal circumstances.

#### Bone-Knitting Laser

A skill rating of at least 40 in *General Medicine* and 20 in *Surgery* is required for work on repairing bone fractures.

### Neural Inhibitor Implant

Only a trained surgeon in a fully equipped Federation hospital can implant or remove this device.

### Neuroanalyzer

This is a shipboard system only. Skill ratings of at least 40 in *Psychology* and 20 in *General Medicine* are required to interpret any findings.

### Protoplaser

With a five-minute application, anyone with a skill rating of 10 or more in *General Medicine* can use this device to heal half the MAX OP END loss from any wound of fewer than 10 damage points.

Protoplasers are also used for more involved healing and surgery, but such use has already been figured into the medical rules. Major blood vessel, nerve tissue, and other delicate work requires a skill rating of at least 40.

### Psychotricorder

The technician must have skill ratings of 40 in *Psychology* and 50 in *Computer Operation*. Skill rolls required to make a scan are made against the ratings in both skills, at a modifier of -20.

### Portable Repressor Field Generator

A skill rating of at least 20 in *General Medicine* is required for use.

### Sonic Separator

A skill rating of at least 20 in *General Medicine* or 20 in *Surgery* is required for use.

### Spray Dressing

Anyone with a skill rating of 10 or more in *General Medicine* can apply spray dressings.

### Stereotaxic Screen

This is a shipboard system only. Skill ratings of at least 20 in *Psychology* and 20 in *General Medicine* are required to administer the test.

### Surgical Probe

A skill rating of at least 20 in *General Medicine* is required for use.

### Telescan Cephalic Implant

Skill ratings of at least 40 in *General Medicine* and 40 in *Surgery* are required for use. Starship sick bay or base facilities are also needed to implant or remove the device.

If paired implants are made into individuals of different races, there is a 10 percent chance per day that the individual with the higher PSI score may (involuntarily) begin to take over the mind of the other person. The gamemaster will need to determine how this will affect play.

### Medical Tricorder

#### MEDICAL TRICORDER ABILITIES

ScanType	Information Obtained	Ranges	
		Standard, Improved	Standard
Chemical Composition			
General	Presence; direction, distance	150	100
Specific	Exact chemical composition; effects	15	1.5
Life Forms			
General	Biological data	25	
Specific	Diagnostic medical data	10	1.5

### Trilaser Connector

Skill ratings of at least 50 in *General Medicine* and 60 in *Surgery* are required for use. This device is twice as effective as a protoplaser.

## KLINGON EMPIRE

### Biosupport Monitor System

Availability: 5 percent.

### Diagnostic/Support Table Panels

Availability: 2 percent.

### Foam Dressing Applicator

Availability: 20 percent.

### Laser Scalpels

Availability: 15 percent.

### Medical Pouch

Availability: 15 percent.

### Organic Suture

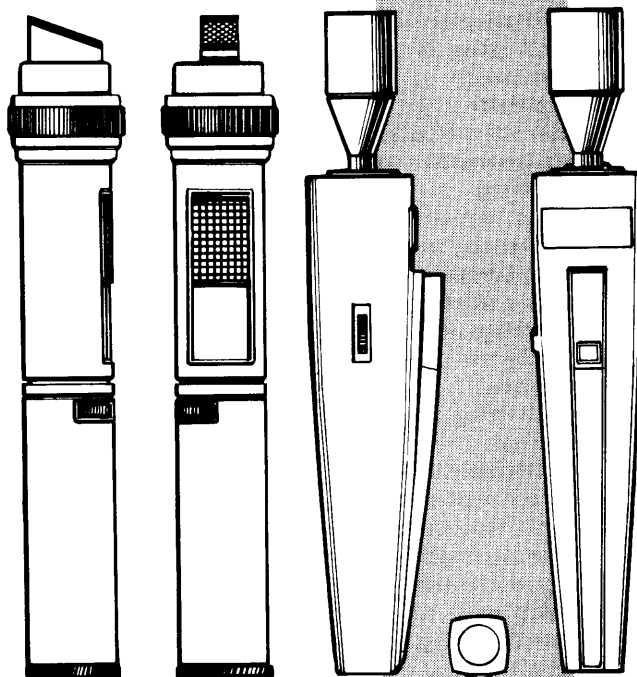

Availability: 15 percent.

### Pneumatic Hypodermic

Availability: 20 percent.

### Vital Signs Reader

Availability: 10 percent.

## ROMULAN STAR EMPIRE

### Electronic Scalpel

Availability: 10 percent.

### Hypo

Availability: 15 percent.

### Medical Belt

Availability: 5 percent.

### Medication Pouch

Availability: 10 percent.

### Portable Power Supply

Availability: 2 percent.

### Protoplaser

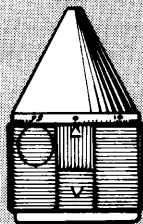

Availability: 5 percent.

### Vital Signs Reader

Availability: 10 percent.

### Wound Dressing Pads

Availability: 15 percent.

## DRUGS AND TOXINS

Drugs and toxins have specific purposes and side-effects that the gamemaster will have to judge as circumstances require. This list is by no means exhaustive, and the gamemaster may create other drugs to perform specific needs. To maintain game balance, every drug having a potentially overpowering effect should also have a significant side-effect.

### FEDERATION

All Federation drugs and toxins are available at the request of any character with a minimum skill rating of 40 in *General Medicine* or 20 in *Pharmacology*.

#### Adrenalane

While in effect, this drug causes temporary increases of 5D10 in a character's STR, END, and DEX scores. After the effects wear off, the character suffers temporary decreases of 5D10 in his original END and DEX scores, and 7D10 in his original INT score.

#### Antitoxins

To determine if an antitoxin is effective, have the Medical Officer roll percentile dice. If the roll is 50 or less, the antitoxin will cure 4D10 damage points; otherwise, roll again. If the second roll is 50 or less, the antitoxin will cure 2D10 damage points; otherwise, roll again. If the third roll is 50 or less, the antitoxin will cure 1D10 points. If none of the three is 50 or less, the antitoxin is totally ineffective. The 50 percent chance may be adjusted, depending on the circumstances.

#### Coradrenaline

This drug neutralizes 2D10 points of damage from cold-based sources, and cuts further damage in half for the next three hours.

#### Neural Paralyzer

The coma begins 1D10 + 5 minutes after the injection. If an injection of a light stimulant is not administered within a number of minutes equal to the character's END score, he will die.

#### Sedatives

Sedatives produce a temporary reduction in CURR OP END, which is treated much like fatigue. A light sedative reduces the CURR OP END score by 2D10 + 10 for two hours. A medium sedative reduces the CURR OP END score by 2D10 + 25 for four hours. A heavy sedative reduces the CURR OP END score by 2D10 + 40 for six hours.

If a sedative drops the CURR OP END score below the INACT SAVE of 20, the character must make an END saving roll to avoid unconsciousness. If the score drops below the UNC THRESH of 5, he automatically loses consciousness. When the sedative wears off, the CURR OP END returns to its previous level, counting in any normal healing that occurred during unconsciousness.

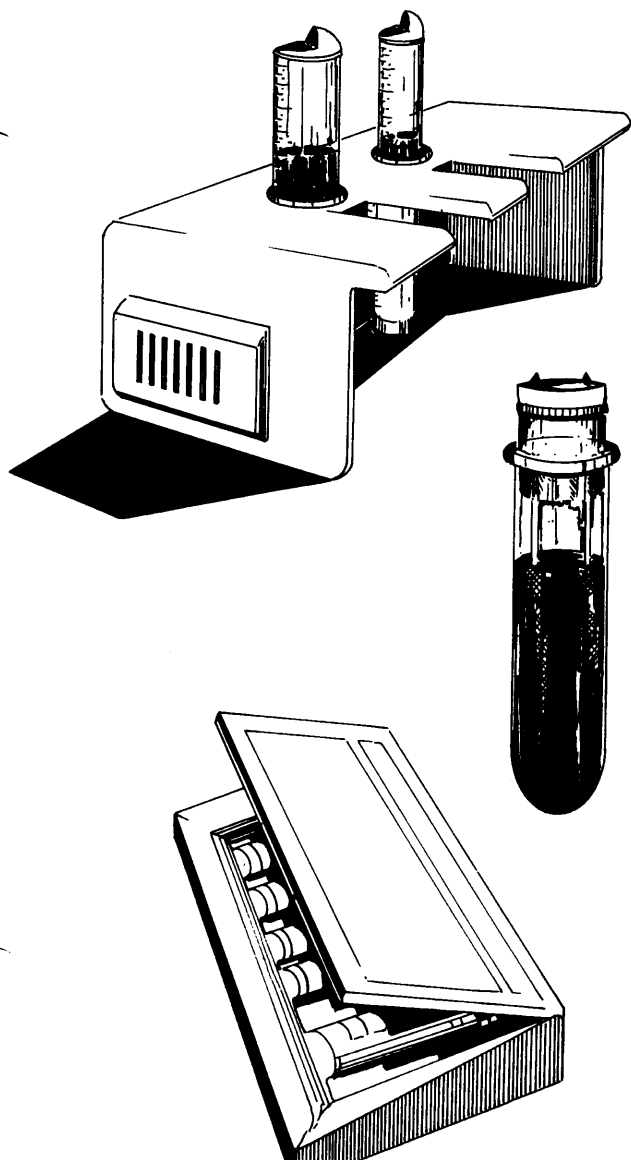

If a sedative's effect would drop a character's CURR OP END score below zero, calculate the number of points below zero the score would go. The character must make an immediate Saving Roll against his MAX OP END score, minus the number of points below zero caused by the sedative's effect. If the roll is unsuccessful, the character has been overdosed and his MAX OP END score drops to the level below zero that was calculated. The character will die without medical attention and successful emergency first aid.

## Stimulants

Stimulants provide a temporary boost in the *CURR OP END* score. A light stimulant adds 1D10 to *CURR OP END* for a number of minutes equal to the character's *END* score. A medium stimulant adds 2D10, and lasts twice as long. A heavy stimulant adds 3D10 and lasts three times as long.

If giving a stimulant to an unconscious person brings his *CURR OP END* score above the *UNC THRESH* of 5, he regains consciousness for as long as the stimulant's effects last. Then the *CURR OP END* score returns to the original depressed state. A light stimulant will awaken a person who passed out before reaching the *UNC THRESH*. Unlike a more seriously injured character, that person will stay conscious unless his *CURR OP END* score is dropped below the *UNC THRESH* by further injury.

When stimulants wear off, the character must make a Saving Roll against his *MAX OP END* score. For a light stimulant, the roll is made without modifiers. For a medium stimulant, there is a -10 modifier to the *MAX OP END* score, and for a heavy stimulant, there is a -25 modifier. If the roll succeeds, there is no adverse effect on the system when the drug wears off. If the roll fails, the stimulant damages the character's system. A light stimulant does 1D10 - 5 damage points, a medium stimulant does 1D10 - 3 damage points, and a heavy stimulant does 1D10 damage points. A result of zero or less means no damage was taken.

## Warning About Sedatives And Stimulants

The gamemaster should carefully control the use of sedatives and stimulants (as he should control the use of all drugs) to avoid unbalancing the game. They can be highly useful as a plot device or last-minute aid, but their use should be severely restricted.

Only a doctor or someone with a skill rating of at least 40 in *General Medicine* should be allowed to administer sedatives and stimulants. Gamemasters are encouraged to keep a close eye on their use and to find ways to discourage player characters if they misuse them to unbalance the game.

Stimulants and sedatives can be given unusual or annoying side effects. A light stimulant such as Formazine can cause irritability. A heavy stimulant like Cordrazine can cause severe mental imbalance and a feeling of acute paranoia lasting for anywhere from a few hours to a week, depending on the size of the dosage and the *END* score of the character. A light sedative like Melanex can cause a vivid yellowing of the skin while the victim is under its influence.

## Toxins

These toxins are considered to be fatal. Gamemasters may wish to create their own symptoms for these diseases, or even create new toxins entirely. For reference purposes, the toxins below list the name of the *STAR TREK* TV episodes in which they were mentioned.

Choriocytosis: The animated episode "The Pirates of Orion".

Rigellian fever: "Requiem for Methuselah".

Sakuro's disease: "Metamorphosis".

Synthococcus novae: "The Way to Eden".

Vegan choriomeningitis: "The Mark of Gideon".

Xenopolycythemia: "For the World Is Hollow and I Have Touched the Sky".

## UniTheriDrene

After being injected with this drug, the character will experience a temporary 20-point increase in his *STR* score and a corresponding decrease in his *END* score. This increase lasts for a number of combat rounds equal to the character's original *END* score divided by 10 (rounded down). After the drug wears off, the character's *STR* score will return to normal and his *END* score will remain reduced for one hour.

## Venus Drug

Any character of the opposite sex who encounters someone under this drug's influence must make a Saving Roll against his *INT* score with a -25 penalty modifier. Any character who fails his roll becomes entranced by the character's appearance (treat as Orion Green Slave appeal). Only Vulcans are immune to the effect. One dose lasts for approximately four hours.

## OTHER GOVERNMENTS

### Cylanite (Orion)

This drug decreases a victim's *DEX* score by 6D10 points, and there is a 25 percent chance of death within 2D10 minutes if not treated.

### Diaprimone (Romulan)

To avoid administering an accidental overdose, the physician must make a successful Skill Roll against of either *General Medicine* or *Pharmacology* (his choice) and his *LUC* score.

## WEAPONS

### FEDERATION

#### Blast Rifle

Availability: 35 percent per group member.

#### Laser Weapons

Availability: 50 percent (either hand laser or laser rifle) per group member.

#### Phaser I-A (Hand Phaser)

Availability: 100 percent per group member.

#### Phaser I-B

Availability: 75 percent per group member.

#### Phaser II-A (Phaser Pistol)

Availability: 100 percent per group member.

#### Phaser II-B

Availability: 75 percent per group member.

### Grenades And Grenade Launchers

Grenade launcher availability: 20 percent per group member.

Grenade availability (case of 6): 25 percent per group member (their choice of grenade types).

#### MAM Charge

Availability: 1 percent per group member.

#### Phaser Bore

Availability: 10 percent per group member.

#### Tranquilizer Ammunition

Availability: 100 percent per group member.

#### Stun Carbine

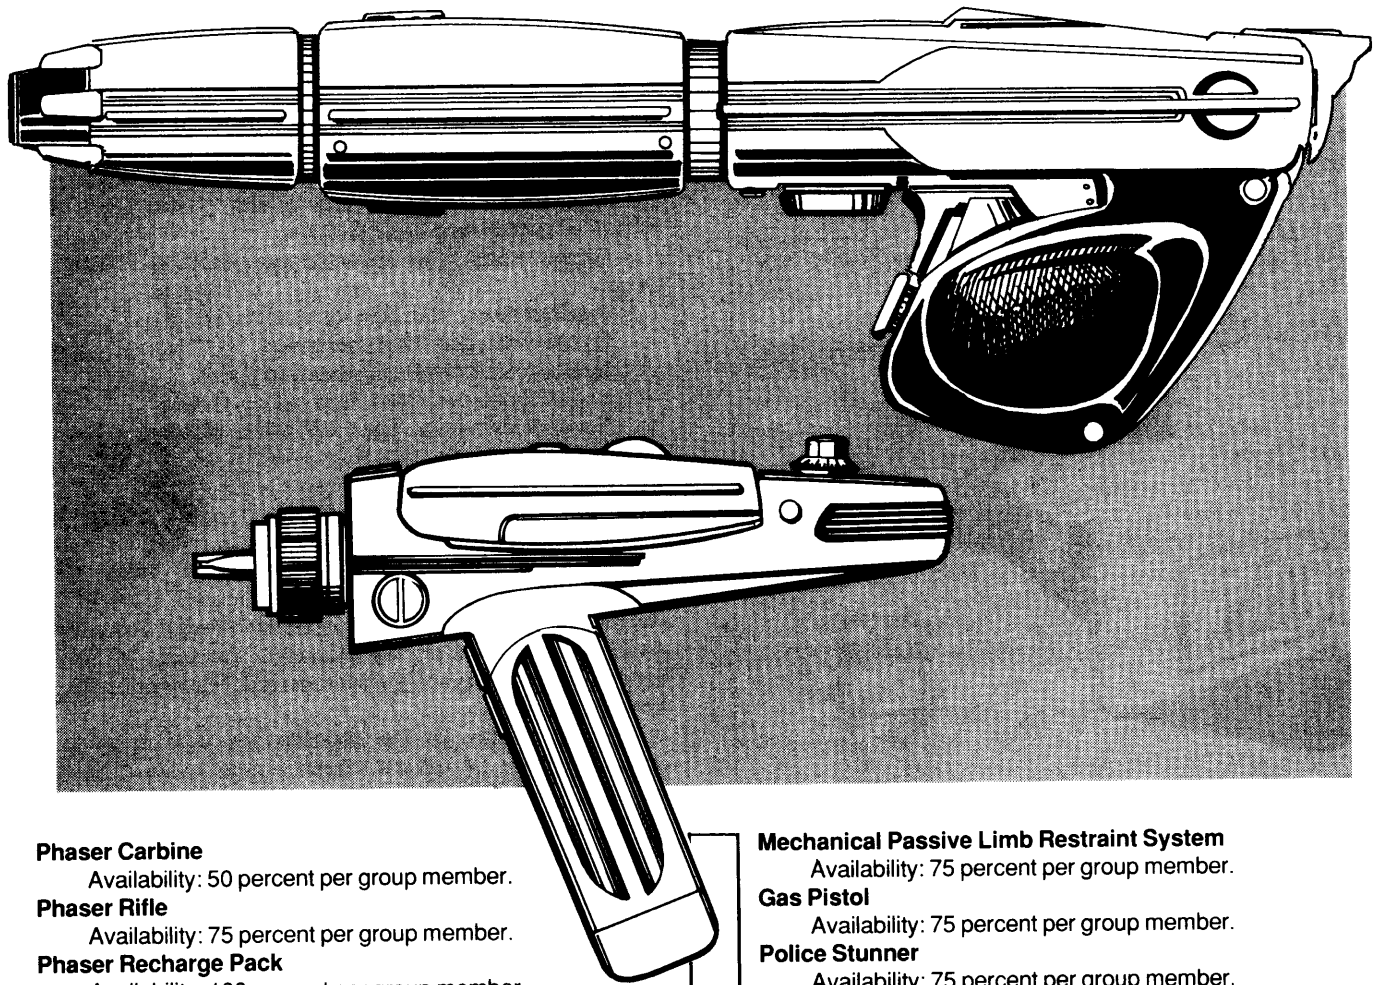

Availability: 75 percent per group member.

#### Force Field Box

Availability: 75 percent per group member.

#### Magnetic Passive Limb Restraint System

Availability: 100 percent per group member.

#### Phaser Carbine

Availability: 50 percent per group member.

#### Phaser Rifle

Availability: 75 percent per group member.

#### Phaser Recharge Pack

Availability: 100 percent per group member.

#### Plasma Rifle

Availability: 100 percent to terminators. 20 percent per other group members.

#### Shathra, Orion

Availability: 20 percent per group member.

#### Suppressed Anti-Personnel Projector

Availability of SAPP: 35 percent per group member.

Availability of darts: Gamemaster's discretion, darts to be prepared before mission begins.

#### Plasticene Explosives

Availability: Gamemaster's discretion.

#### Mechanical Passive Limb Restraint System

Availability: 75 percent per group member.

#### Gas Pistol

Availability: 75 percent per group member.

#### Police Stunner

Availability: 75 percent per group member.

#### Net Rifle

Availability: 50 percent per group member.

#### Shock Prod

Availability: 35 percent per group member.

#### Specimen Restraint Box

Availability: 50 percent per group member.

#### Stun Club

Availability: 100 percent per group member.

#### Miniaturized Stunner

Availability: 35 percent per group member.

#### Tanglegun

Availability: 50 percent per group member.

### Security Armor

Availability: 20 percent per group member.

Characters with a skill rating of 10 or more in *Security Procedures* are trained in the use of this suit. Untrained characters who wear the suits lose 1 AP per turn.

Untrained persons will take a minimum of two minutes to don the armor. At the end of this time, they must make a Saving Roll against their DEX score. Failure requires an additional minute and another DEX saving roll with a modifier of +5. Additional attempts may be made each following minute until successful.

It requires only 1 AP to put on a helmet, but 3 more AP to hook up and adjust the built-in communications gear before it can be used.

### Duroplas Body Shield

Availability: 35 percent per group member.

The effect of physical blows on the wearer's front torso will be reduced by 10 points. Energy weapon attacks will be reduced by 15 points for up to five attacks, at which point the body shield becomes useless.

### Psionic Shielding Helmet

Availability: 1 percent per group member.

The helmet has no value as armor, and will be rendered inoperative by a 10-damage-point hit. Any character wearing such a helmet is invulnerable to standard telepathic contact.

### Automatic Bridge Defense System

Availability: 75 percent per Intelligence Command starship.

## KLINGON EMPIRE

### Mark I Hand Disruptor

Availability: 75 percent per group member.

### Mark II Hand Disruptor

Availability: 50 percent per group member.

### Mark III Hand Disruptor

Availability: 20 percent per group member.

### Mark I Disruptor Rifle

Availability: 35 percent per group member.

### Mark III Disruptor Rifle

Availability: 15 percent per group member.

### Agonizer

Availability: 20 percent per group member.

A character subjected to this device on the high setting must make a successful Saving Roll against his END score to take any action at all. A modifier of -50 is applied to this roll.

### Personal Combat Blade

Availability: 35 percent per group member.

### Zhal Sta

Availability: 10 percent per group member.

If a character using this weapon in open melee misses his target, he must then make an immediate Saving Roll against the average of his DEX and LUC scores. If that roll is also unsuccessful, the character has inflicted 2D10 points of damage to himself.

### Grenades

Availability (case of 6): 5 percent per group member.

### Sonic Mortar

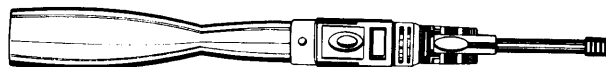

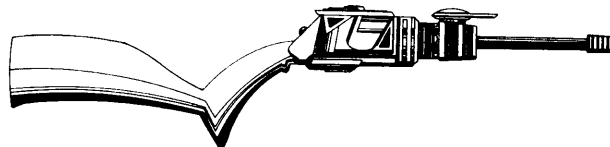

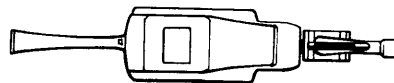

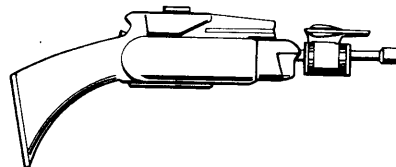

Availability: 5 percent per group.

### Force Field Box

Availability: 20 percent per group member.

### Portable Shield Generator

Availability: 5 percent per group.

## ROMULAN STAR EMPIRE

### Hand Disruptor

Availability: 10 percent per group member.

### Dueling Stick

Availability: 15 percent per group member.

### Beam Cannon

Availability: 2 percent per group member.

### Magnesium Incendiary Bombs

Availability (case of four): 5 percent per group member.

### Energy Rod

Availability: 35 percent per group member.

## GORN ALLIANCE

### Mark I Blaster

Availability: 15 percent per group member.

The Gorn military-issue blaster pistol was designed for the massive Gorn hand. Other, less massive races trying to use it must apply a 10-point penalty to the To-Hit Number.

### Mark II Blaster

Availability: 10 percent per group member.

The newer military-issue blaster is not pistol-shaped at all, and mounts a heavy firing bar requiring more pulling force than the average Human can provide. No character with a STR score of less than 70 can fire the weapon at all. Even those who are strong enough must use both hands, and they must apply a 20-point penalty to the To-Hit Number.

### Sonic Stunner

Availability: 20 percent per group member.

# OTHER INTELLIGENCE AGENCIES

## TERRAN INTELLIGENCE AGENCY

The Terran Intelligence Agency is the official military intelligence-gathering organization within the Sol system. Although their official jurisdiction does not extend beyond this system, TIA agents have been known to operate beyond their borders without authority, sometimes at cross-purposes with Star Fleet Intelligence. Though Terran Intelligence agents have helpful attitudes, they are reluctant to provide substantial assistance or hard data. These agents tend to be a little overzealous when performing their duties, stopping at little to accomplish their goals.

The TIA currently maintains offices on Terra, Luna, Mars, Ceres, Ganymede, and Titan. Recent rumors that a branch office has opened up on Alpha Centauri have proved to be false. Star Fleet Intelligence Command officially maintains good relations with the TIA and always informs their senior personnel whenever Intelligence operations take place within Terran jurisdiction. Unfortunately, the opposite is rarely true, and there is some professional rivalry, not all of which is friendly.

## ANDORIAN CORPS OF ENFORCERS

The Andorian Corps of Enforcers is a secret military unit controlled by the Epsilon Indi Council of Clans. It contains a small number of elite Andorian agents specially trained to protect the interests of the Andorian government. Though the corps was disbanded officially after Star Fleet Intelligence Command was founded, it was reinstated a short time later. Apparently, Andorian military leaders were unsatisfied by Star Fleet's comparative lack of interest in safeguarding Andorian interests.

There are less than 100 enforcers in this organization, and most Star Fleet Intelligence agents serve their entire terms without ever meeting their blue-skinned counterparts. The Enforcers' sense of duty is unusually strict, even by Andorian standards. It closely resembles that of Terra's Oriental Ninja, though enforcer operational goals are more like those of Terra's ancient assassin's guild. These agents will not take prisoners, nor will they be taken alive. Every Enforcer would be qualified as a terminator by Star Fleet Intelligence's standards, and they almost always work alone. All Enforcers operate from Andor, and are dispatched as needed. Almost no information on this organization should be available to player characters.

## KLINGON DIPLOMATIC CORPS

Though Klingon society is rife with security personnel, the Klingon Diplomatic Corps would probably be the closest equivalent to Star Fleet Intelligence. That is, most conflicts involving espionage occur between Star Fleet Intelligence Command and their counterparts in the KDC. Recent KDC activities involving *Bird of Prey* Class scouts within Federation space show its willingness to challenge UFP forces in

Federation territory. Many Klingon Activities Unit analysts believe this may be a prelude to a full-scale war of even greater magnitude than the Four Years War, which took place over two decades ago. The KDC's methods have become increasingly obvious, and the situation will probably only grow worse over the next several years. For additional information, refer to **The Klingons** supplement or the **Klingon Intelligence Briefing**, published with **Conflict of Interests**. These documents are available from Klingon Sector Intelligence or directly from FASA.

## ROMULAN MILITARY DIVISION INTELLIGENCE

The Romulan Star Empire maintains separate intelligence units for each division of their forces. The unit having the most contact with Federation Intelligence agents is Military Division Intelligence. Compared to the Klingons, the Romulans have adopted a much subtler program of infiltration. Romulan Commander Decartus, Director of Security Operations for the Military Division, is known for his patience and intricate plans. Rather than conduct a direct offensive against the Federation, the Romulans appear satisfied with gaining a larger foothold within the Triangle. By increasing their influence in this area, the Romulans may be able to take over one or more coalition governments, adding vital resources and manpower (in the form of slaves) to the Romulan Empire. If continued and successful, this insidious process may be more of a threat to the Federation's well-being than the Klingon's direct assaults.

## ORION COLONIES INTELLIGENCE

Intelligence sources believe that numerous Orion families each maintain limited intelligence-gathering capabilities. Apparently, they hire mercenaries of all races to spy on the Federation and the Klingon Empire (as well as the other families). As the Orions possess no single, unified government, their resources appear to be deployed inefficiently, but they do have the advantage of being able to travel widely without being declared hostile. The Orion Colonies have not fully abided by any recent trade restrictions, and the galaxy-wide presence of Klingon weapons indicates that Orions are conducting a bustling trade with the Klingon Empire. Though Orion spies may be insignificant in terms of scope or military applications, Star Fleet Intelligence agents must not underestimate their potential effectiveness. They have proven their skill in relaying information to the Klingons and other hostile powers who are willing to bid for Orion-gathered secrets.

\*Non-permanent damage

Phaser I, II, and rifle stun effects last 2D10 + 10 minutes.

Heavy stun effects last 3D10 + 20 minutes.

<sup>1</sup> If blunt end is used, damage is treated as 'stun'.

<sup>2</sup> Plus poison effects, if any.

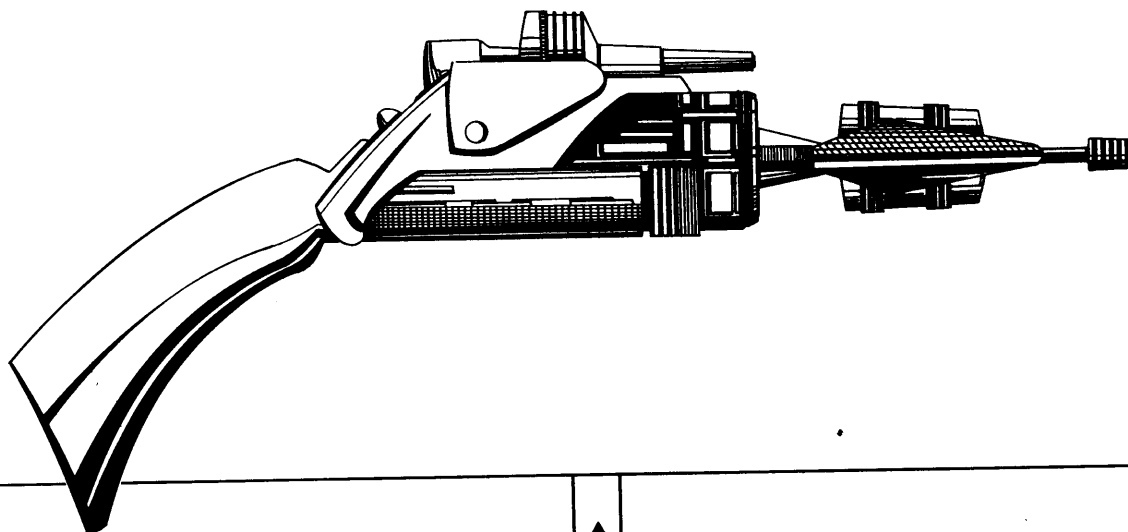

<sup>3</sup> If weapon misses, it returns to user.

<sup>4</sup> Maximum rate of fire is once per minute (6 combat rounds).

<sup>5</sup> Damage is adjustable by user.

<sup>6</sup> 4D10 + 15 at pointblank or short; 4D10 + 10 at medium; 4D10 + 5 at long; 4D10 at extreme range.

<sup>7</sup> Minimum effective range is 10 squares.
